VIDEO BALANCE INDICATOR

TYPE BH126 DATA SHEET

- An essential aid for the installer
- Designed for twisted pair cables
- Portable hand held unit
- Can be operated from internal battery or mains supply

APPLICATION

The BH126 Video Balance Indicator will aid the installer in checking and adjusting a range of CCTV equipment. The BH126 is designed for use with twisted pair cables.

The unit is connected to the balanced output of the equipment under test. The BH126 will then show if the twisted pair output signals are correctly balanced and if not enable the correct adjustment to be made. If no video signal is detected then a red lamp flashes on the front panel.

The BH126 can be operated from its internal battery or from a 12V dc regulated power supply that also charges the unit when connected. The 12V power supply is included with the unit.

Addlestone Electronics Ltd.

DESIGNED AND MANUFACTURED IN UK

TWISTED PAIR INPUT

CONNECTION

Miniature binding poles.

BALANCED SIGNAL

INDICATOR

One green LED to show when balanced and two red LED's to indicate when unbalanced (on front

panel of unit.

NO VIDEO WARNING

Red lamp in centre of front panel.

INTERNAL CALIBRATION

CONTROL

Factory set.

POWER REQUIREMENTS

+12V dc regulated supply.

BATTERY LIFE

Approx. 2 hours of average use.

BATTERY RECHARGING

PERIOD

Approx. 12 hours for completely flat battery.

BATTERY ON/OFF

INDICATOR

Green lamp in left hand side panel of unit.

BATTERY ON/OFF SWITCH

On left hand side panel of unit.

POWER SUPPLY DETAILS

INPUT: 230V ac @ 50 Hz 12 Watts

OUTPUT: +12V dc supply - max. of 300 mA /3.6 VA

OPERATING TEMP.

RANGE

-10°C to +40°C.

CONSTRUCTION OF

BH126 CASING

Casing constructed of moulded FR- ABS plastic.

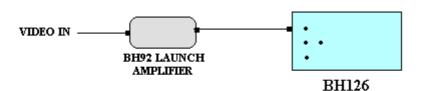

WEIGHT OF BH126 UNIT 215 grams (excluding power supply).

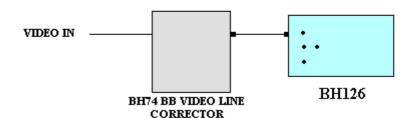

DIMENSIONS OF UNIT

Height 184mm

Depth 35mm

Width 86mm (excluding switch)
