

Security Alarms

4096 alarm inputs can be connected into the system via remote Alarm Control Units. Alarm activations are automatically displayed on Graphic Mimic Maps and can be controlled using the control icons on the map.

CCTV System

Up to 640 cameras can be controlled and switched to 160 monitor outlets. Pan/tilt or dome cameras can be controlled from the PC screen or by any one of 16 remote CCTV keyboards.

Access Control

MEGAsys™ can control up to 60 doors. The card holders photograph can be stored with the card holders information and can be displayed automatically if a CCTV camera is linked into the system.

Guard Patrol Tour

Up to 24 patrol tour routes each with 100 reporting stations can be controlled. The system can be programmed with time to reporting station and reporting route. Alarms can be generated if the wrong route is taken or the guard is early or late in reporting.

Key Features

- Fully integrated management systems
- Alarm Monitoring
- CCTV Control
- Access Control
- Guard Patrol
- Program up to 4096 optically isolated outputs

Control Outputs

Up to 4096 optically isolated outputs can be programmed. These can be used for any switching function, e.g. operating lights, barriers, interfacing to other video switching systems etc. They can be linked by pre-defined Macro sequences to any alarm, CCTV or access function.

PC System	500 MHz or Better Tower PC	4 GB Hard-drive
	32 MB Ram	3.5" FDD
	48 x CD-ROM	17 inch Monitor
	Video Card	Sound Card
	Windows NT	Keyboard
	Mouse
