Avigilon Smart Keypad Readers

Expandable access control for the modern workplace

The Avigilon Smart Keypad Readers revolutionize PIN code access. Available in a Standard and Mullion form factor, Avigilon Smart Keypad Readers are designed for ease of use for both credentialed users and visitors. Built to last, the durable, capacitive touch keypad prevents spoofing, and the multi-technology, cloud-based device allows remote unlock and PIN-activated lockdown. Avigilon Smart Keypad Readers work seamlessly with the cloud-native Alta Access providing visibility and management from anywhere.

Streamlined installation

Sleek form factor is easy to mount and install with standard electric wiring. Flexible mounting options to suit a variety of deployment needs, indoors and out.

Protected and fail safe

Tamper resistant, and designed to withstand power failures and internet outages. Readers store no data, and encrypted end-to-end communication and strong public-key cryptography to keep everything protected.

Fast, reliable mobile unlocks

Patented Triple Unlock with Bluetooth, WiFi and cellular data ensures reliable unlocks with mobile credential options like Wave to Unlock, Apple Wallet, or the Alta Open app for mobile or smart watch.

Easy management and monitoring

Software runs in the cloud for easy, secure access and remote monitoring, without the need for local servers. Built-in diagnostics and real-time troubleshooting insights streamline management.

Flexible access options

Built-in keypad for multi-factor authentication with a PIN combined with any number of credentials, including mobile, high-frequency and low-frequency keycards, fobs, and Cloud Key. Or, use the keypad to provide PIN code access for guests.

Lifetime limited warranty

Avigilon's access control hardware is backed by a limited lifetime warranty, helping ensure lasting quality.
