AXIS P33 Network Cameras constitute a series of indoor and outdoor-ready fixed domes designed for efficient installation. Offering high performance video, including HDTV image quality and multiple H.264 streams, these cameras are ideal for unobtrusive video surveillance in exposed areas such as airports, subways, retail stores, schools and university campuses.

AXIS P33 Series delivers superb video quality in 30 frames per second in full resolution. AXIS P3343 Network Cameras provide SVGA resolution, whereas the AXIS P3344 models offer 1MP, or HDTV 720p in compliance with the SMPTE standard in resolution, color representation and frame rate.

AXIS P33 Network Cameras support automatic day and night functionality with removable infrared-cut filter for increased light sensitivity.

AXIS P33 Series provides multiple, individually configurable video streams in H.264 compression, which greatly optimizes bandwidth and storage without compromising image quality. Motion JPEG is also supported for increased flexibility.

The remote focus feature allows for convenient installation eliminating the need for hands-on focusing at the camera, and the remote zoom and pixel counter features ensure that the camera's viewing angle is optimized for the scene and pixel resolution.

AXIS P33 Network Cameras range from standard indoor models to vandal-resistant outdoor models, perfectly adapted for harsh environments. All models in AXIS P33 Series have low, environment friendly power consumption, supplied by standard Power over Ethernet (IEEE 802.3af). This is the case even for the weatherproof models that operate in extreme temperatures from -40° to 55° C (-40° to 131 °F).

HDTV NETWORK VIDEO

Fixed domes designed for efficient installation – indoors or outdoors

AXIS P33 Series is the perfect choice for a wide range of demanding video applications in outdoor and indoor environments. AXIS P33 Network Cameras are designed for professional video surveillance with easy and reliable installation in focus.

Outdoor-ready installation for extreme temperatures

The outdoor models of AXIS P33 Series are specially designed for reliable, vandal-resistant and weather-proof installation, with pre-installed heater and fan, and an integrated dehumidifying membrane eliminating any humidity caught in the camera casing during installation. These cameras come with a 5 m (16 ft.) Ethernet cable with a pre-mounted, specially designed gasket, enabling flush wall mounting and requiring no additional sealant. A weather shield is also included for effective protection against reflections from sunlight, or build-ups of rain or snow.

Mounting options

AXIS P33 Series offers a wide range of optional indoor and outdoor mounting kits for installation in a drop ceiling or on a wall, pole, corner or junction box, etc. Both indoor and outdoor camera models include a smoked transparent cover as an alternative to the clear cover, for additional flexibility.

### Easy installation with remote focus and zoom

AXIS P33 Network Cameras offer unique installation capabilities with remote focus and zoom. The remote focus feature enables convenient focusing over the network, eliminating the need for hands-on fine-tuning at the camera. The remote zoom functionality ensures that the viewing angle is optimized for the area to be monitored.

Unique pixel counter feature

The unique pixel counter offered in AXIS P33 Series allows the installer to easily verify that the camera installation fulfills any regulatory or specific customer requirements, for example calculating the pixel resolution of the face of a person passing a doorway monitored by the camera.
