

## XF60-Q2901 Explosion-Protected Temperature Alarm Camera

Temperature detection in hazardous areas

XF60-Q2901 Explosion-Protected Temperature Alarm Camera is suitable for onshore, offshore, marine and heavy industrial environments. The stainless steel housing is certified for areas that are hazardous according to UL, and it prevents any inside sparks or explosions from escaping and igniting vapors, gases, dust or fibers in the surrounding air. The camera supports temperature alarm zones triggering alarms based on deviation of the temperature. It tells the temperature of a particular area. Easy visualization of hot spots with isothermal palettes to identify overheated equipment or areas. The network camera offers a high level of integration with other equipment, such as access control and fire alarms.

- > Stainless steel (SAE 316L) housing
- > 336x256 thermal resolution
- > Temperature alarm and isothermal palettes
- > Spot temperature reading
- > Wide temperature range

## XF60-Q2901 Explosion-Protected Temperature Alarm Camera

| Models                                  | XF60-Q2901 -50 C 110 V UL  |
