The Hi-Q recorder delivers high quality, real time digital video recording even when using all four channels. Its four MPEG-2 compression engines provide crystal clear, high resolution video while optimizing hard disk space.

The Hi-Q recorder complements any existing system. Its four contact alarm inputs, motion detection, and one-touch alarm button make it ideal for event recording. With simultaneous recording, archiving, and playback, all from the front panel, the Hi-Q is the perfect spot monitor recorder to enhance an existing analog system. Imagine instantly reviewing high quality

video while the device continues recording without interruption.

The Hi-Q can record up to 48 hours of continuous, real time video on all four channels. Total recording time can be further extended and optimized by selecting the right combination of the four time-lapse modes, three quality settings, and built-in scheduler. For even more storage, the Hi-Q recorder is compatible with archiving devices.

Powerful Hi-Q features include dark and sync loss alarms, dual monitor outputs, quad and full screen display, digital PTZ, audio, sequencing, motion detection, and password security.
