

# LTC 8561, LTC 8564/20, LTC 8566 Series Single-channel On-site Receiver/Drivers

- ► Full-featured pan/tilt/zoom/aux control
- ► Auto-pan/random pan
- ► Bi-Phase or RS-232 data input
- ▶ 99 Pre-positions with tour capability
- Pre-positions compatible with 360° continuous pan/tilt drives
- ► Integral local test feature

The LTC 8561 Series, LTC 8564/20, and LTC 8566 Series On-site Receiver/Drivers are control data decoder units and motor drivers for pan/tilt units and zoom lenses. These receiver/drivers are used in conjunction with Allegiant® Series Microprocessor-based Switcher/Controller Systems.

The receiver/driver decodes Allegiant Bi-Phase control data from the switcher/controller system through the LTC 8568/00 Signal Distribution Units into specific control codes. In addition, the receiver/driver will accept RS-232 control code data generated by the LTC 8780 Series Data Converter Unit.

These receiver/drivers are available in a variety of input and output voltage configurations. All units are 50/60 Hz line frequency compatible. All units have low voltage DC lens drivers (6 volts or 12 volts selectable) for focus, zoom, and iris with adjustable speed. There are also four auxiliary outputs. One is a solid state relay with zero crossing switching fixed to the same voltage as the pan/tilt output. The others are relays which can supply voltage through contacts (normally open or normally closed) to control lights or other devices at the remote site. Auxiliary supply terminals provide power which is fuse-protected at the voltage of the pan/tilt output.

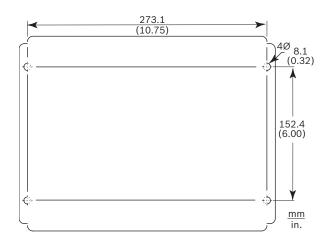

Advanced features include 99 pre-positions when using conventional 355° pan/tilt drivers, 82 pre-positions when using 360° continuous pan/tilt drivers, installer friendly connectors, lockable enclosure latches, 10-bit resolution for improved pan/tilt pre-position accuracy, and automatic pre-position tour capability.

Additional features include a full operating temperature range, an integral local test function, an unrestricted autopan feature for all models of pan/tilts, random pan, a unique dither feature, selectable latching or momentary auxiliaries, polarity reversible lens drive, convenient thumbwheel selectable camera addressing, and a NEMA-4X, IP66 rated environmental enclosure.

### **Certifications and Approvals**

_	Electromagnetic Compatibility (EMC)	Complies with FCC Part 15, ICES-003, and CE regulations
	Product Safety	Complies with CE regulations, UL, CSA, EN, and IEC Standards

## **Installation/Configuration Notes**

Mounting Hole Pattern

### LTC 8564/20 AC Supply Wiring Guide

Wire Size		0.5 A Load		1.0 A Load		1.5 A Load		2.0 A Load	
mm <sup>2</sup>	AWG	m	ft	m	ft	m	ft	m	ft
0.5	20	30	100	20	70	15	50	12	40
1.0	18	50	150	30	100	25	75	20	70
1.5	16	80	260	50	150	40	130	30	100
2.5	14	130	420	90	290	60	200	50	150
4.0	12	200	650	140	460	110	350	90	290

Table is based on a nominal 24 VAC source with a 10% drop in voltage due to cable loss.

# **Technical Specifications**

### **Electrical**

Model No.	Rated Voltage <sup>1</sup>	Voltage Range	Pan/Tilt, Aux <sup>1</sup> , & Aux Supply
LTC 8561/60 <sup>2</sup>	120 VAC, 50/60 Hz	100 to 130	120 VAC, 50/60 Hz
