BQT EIP602 EasyView NVR

To view a video demo of Easyview in motion click hereThe BQT EIP602 EasyView NVR server supports continuous, schedule, alarm and motion recording with pre-event and post-event time period programmable on per-channel basis. The EIP602 NVR system records video in a MPEG-4 format supporting all BQT IP cameras and the BQT video server, EIP510. The EasyViewTM NVR Server is installed on a powerful PC Server Unit with a server operating system suitable for meeting the requirements for IP video recording. The server is equipped with 2TB HDDs allowing to store video from several weeks depending on the camera settings (frame rate, resolution and recording mode). For live viewing and playback of the connected IP cameras, please use an BQT EasyView IP Client, which is sold separately. Main features:

 - Supports recording of up to 32 BQT IP cameras
 - Web-based Interface for NVR Server Management
 - Records video + audio format in ISO-14496-2 MPEG-4 format
 - Continuous, Schedule, Motion, Alarm Recording
 - Search functions based on channel, date, time and events
 - Active Storage Management to manage disk capacity
 - Remote Preview and Remote Playback via EasyViewTM IP Client
 - Streaming Engine
