

I-Command™ Lite

I-Command™ Lite is an intuitive video surveillance application for control and management over small to medium sized CCTV installations.

I-Command Lite is a scalable video management software solution for 1 to 16 fixed or PTZ CCTV cameras. Simple to install and operate, I-Command Lite transforms a standard PC into a total IP video management tool, providing every operational requirement necessary to manage a small to medium sized installation effectively.

Key features of I-Command Lite include:

- Manage up to 16 cameras simultaneously with multiple viewing options and real-time PTZ control.
- Never miss an incident with alarm capture in real time.
- Record up to 16 cameras in real-time, all the time for total surveillance coverage.
- Easy to install, with an intuitive user interface for ease of video monitoring and management.

Core functions of I-Command Lite include:

Offers support for H.264, MPEG4, MJPEG compression standards. Enables integration of COE's X-Net® video servers & I-Vue™ range of IP cameras, as well as extensive third party support for cameras & video servers. Functions such as multiple live video viewing, recording & playback, pan tilt zoom (PTZ) control, alarm reporting and more are combined in an easy-to-use, intuitive interface.

Product Codes

I-CMD4	I-Command Lite Edition Software enabled with Four live/recorded video channels.
I-CMD8	I-Command Lite Edition Software enabled with Eight live/recorded video channels.
I-CMD16	I-Command Lite Edition Software enabled with Sixteen live/recorded video channels.

*Our standard Software Warranty Terms are 90 Days.
Extended Warranties are available, please contact your nearest COE representative for details.*

I-Command™ Lite

System Features

Installation • To install and configure I-Command Lite, there is a simple, intuitive installation procedure. Addition of IP video devices is achieved by entering IP addresses and log-in credentials.

Integration • I-Command Lite integrates both COE and third party IP cameras and video servers, supporting mega-pixel cameras and all common digital video codec standards, such as H.264, MPEG4, MJPEG and MPEG2. In addition, support for analogue video capture cards, as well as full PTZ compatibility for a large number of legacy protocols is also featured. I-Command Lite enables a wide range of IP and analogue PTZ cameras to be utilised side-by-side.

Incidents • To assist the user, device generated alarms may be captured and displayed. Generated alarms include contact inputs and video motion.

Investigation • To enable multiple users to monitor the same network cooperatively, I-Command Lite facilitates multiple PCs to access the camera/server group without a requirement for enlisting the use of large servers and management software.

Interface • I-Command Lite features a simple interface for navigation and monitoring. Viewing options include all industry standard monitoring layouts, such as single, quad, 4 by 3, spot plus cameos, etc. This is augmented by a switchable aspect ratio constraint option to prevent video warping.

Typical PC Requirements:

Processor	Intel® Core 2 Quad Q6600 (2.4Ghz, 8Mb Cache)
RAM Memory	3GB RAM
Hard Drive	500Gb SATA II (recommended)
Optical Drive	DVD/RW
Network	1000-Base T network card configured for full duplex
Graphics Card	NVIDIA® 9600GT 256Mb DDR2 (or equivalent high performance graphics card with Direct Draw and Direct 3D hardware acceleration)
Operating System	Windows XP Professional (recommended)

COE Supported Devices:

COE	X-Net Codec G3
COE	X-Net H-Box
COE	X-Net H-Card
COE	I-Vue IP Camera Range

3rd Party Supported Devices:

ACTi	2100/2600 MPEG4 4100/4200 MPEG4
Arecont	5 Megapixel MJPEG
Axis	MJPEG/MPEG4 products Autodome IP Camera Dinion IP Camera VIP10 Encoder VIPX 1/2/4 - channel
Bosch	ZN-D2024 Static Dome ZN-PT304 PT Camera ZN-YH305 Camera ZV-S306 Encoder
Ganz	
IQeye	5xx Cameras
Mango	1 Channel DSP MPEG4
Messoa	Cameras
Mobotix	Cameras
Pelco	Spectra IV IP Camera Pelco IP110 IP Camera

And More!

Our supported devices library is continually updated to provide the highest level of integration possible between I-Command Lite and 3rd party devices.
