

10-bit digitally encoded video with “Up-the-Coax”* extended distance or bi-directional data (RS232, RS422, RS485 2/4W)

Description

The ComNet™ FVT/FVR109A series is a video transmitter/receiver and data transceiver that supports the simultaneous transmission of short haul quality 10-bit EIA RS-250C digitally encoded video and bi-directional data over one multimode or single mode optical fiber. The module is universally compatible with major CCTV camera manufacturers and supports RS232, RS422 and 2 or 4-wire RS485 data interfaces and most data protocols. It also supports “up-the-coax” data transmission from all major manufacturers, utilizing time-based correction these units can achieve distances of 48km. The FVT/FVR109A supports Panasonic Proteus™, Vicon Vicoax™ and Pelco Coaxitron™ up-the-coax systems. The FVT109A also transmits the state of a contact closure input over fiber to an output relay on the FVR109A. The contact closure is not supported with the FVT109AM. Packaged in the exclusive ComNet ComFit housing, the full-size units may be either wall or rack-mounted, or may be DIN-rail mounted by the addition of ComNet model DINBKT1 adaptor plate.
