

## Internal Housings & Brackets

### Housings iH5 iH4 iH3 Brackets iB5 iB4 iB3

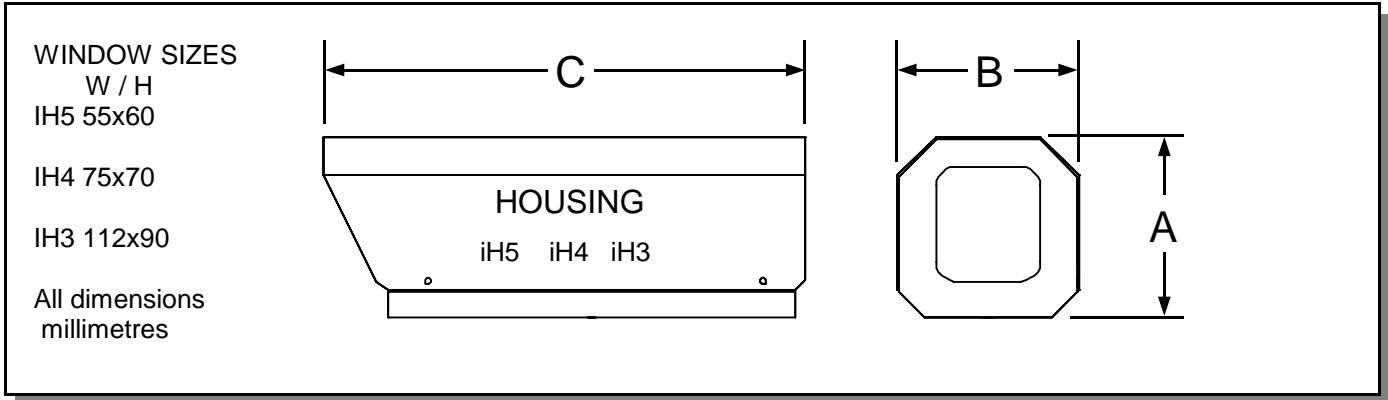

### Conway IH & IB Range

The Conway iH5, iH4 & iH3 range of internal camera housing are designed specifically to provide an environment for camera & lens assemblies that is safe from interference & relatively dust free. The housing also gives the added advantage of hiding cables & wires that could be considered unsightly in a lot of circumstances. As cost is a major consideration the iH range can be offered with smoked Perspex™ window. This has proved popular where the customer needs to protect a multiple of positions but cannot afford to make all of the positions 'live'. The installation can be made with a number of housings, all with smoked screens, but only having a few fitted with cameras.
