# DMVC App

Dallmeier Mobile Video Center App for Android or iOS Operating System

The **Dallmeier Mobile Video Center** App permits mobile access to Dallmeier systems (DVR, NVR, server, cameras) using a **smartphone or tablet** with **Android or iOS operating system**. Both live video and the corresponding recordings can be conveniently accessed on the go. Special transcoding optimizes the video data for display on the mobile device ensuring a high frame rate at the same time.

The Dallmeier App has intuitive operation including multi-touch zoom. For an optimal overview, all cameras are displayed in a list with preview images. The video resolution can be set to QCIF, CIF, 4CIF or HD[1]. A recording and snap shot function is available both in live and playback mode. For a quick and convenient access, a personal favourites list can be created.

The **Dallmeier Mobile Video Center** app is available **for free** in the iTunes App Store or on Google Play.

Features
- Access on live images and recordings
- Clearly arranged camera list with preview images
- Resolutions QCIF, CIF, 4CIF oder HD supported
- Intuitive configuration and operation with multi-touch zoom
