

# SeMSy® III Advanced Package

Server Licenses for 150× Channels, Server Licences for 5× Workstations,  
1× SeMSy® III Advanced Workstation Software with 13 Modules

# SeMSy® III

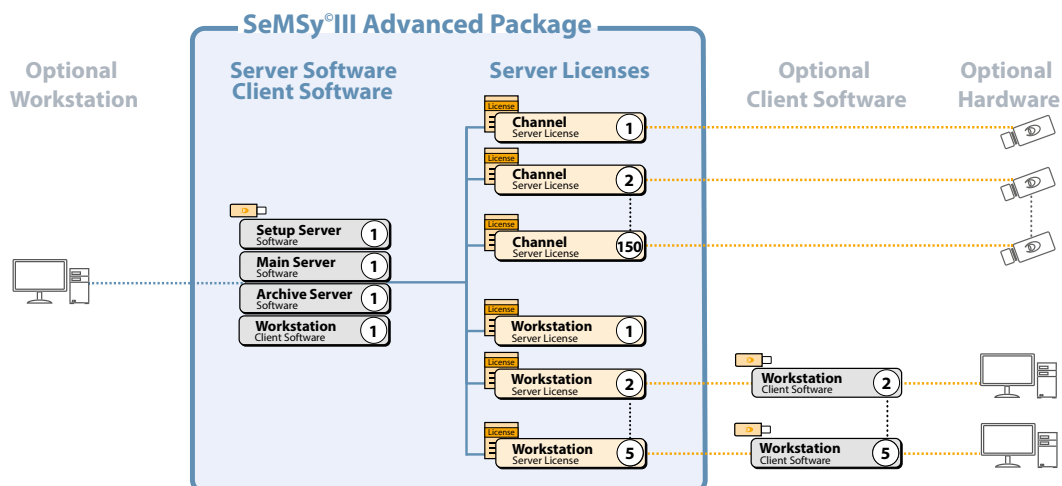

**SeMSy® III** is a high-performance and future-proof video management system with optimum user friendliness. It offers a comprehensive range of functions, including the display of live images, various search options within the footage, the control of PTZ cameras and an easy archiving of relevant sequences.

The **SeMSy® III Advanced Package** includes server licenses for **150 channels** and **5 simultaneously running workstations**. The fundamental **SeMSy® III Server Software** (Setup, Main, Archive) is already integrated as well as one version of the **SeMSy® III Workstation Software** with the following modules:

- SeMSy® III Navigator
- SeMSy® III Mainviewer and SmartFinder
- SeMSy® III Camera Control
- SeMSy® III Archive Client
- SeMSy® III Camera Filter
- SeMSy® III PRemote
- SeMSy® III Panomera®
- SeMSy® III Logbook
- SeMSy® III Monitorwall
- SeMSy® III Salvos
- SeMSy® III Bookmarks
- SeMSy® III Rights Management
- SeMSy® III Hotkeys

The **SeMSy® III Advanced Package** is an **All-in-One installation** of the complete video management system one workstation. It is particularly dimensioned for video surveillance in **train stations, parking lots, public places or amusement halls** and can be adapted anytime by integrating additional channel and workstation licenses.

The **SeMSy® management system** is designed as an **open platform** for the integration of 3rd party systems. In connection with Dallmeier recording systems **3rd party network cameras** compliant with the **ONVIF standard** can be integrated into the video surveillance installation. In addition, the optional **SeMSy® III Interface Server Software** provides a standardized interface for data exchange with **3rd party POS, access controls or dealing shoes**.
