

SMAVIA Viewer

Backup Viewing Software for Windows Systems

SMAVIA Viewer is a free-of-charge viewing software for the independent **evaluation of the backups** made by SMAVIA appliances and by Dallmeier recording systems of the 3rd and 4th generation.

Installable or Portable Version

SMAVIA Viewer is offered as an installable version for Windows operating systems and can be downloaded free-of-charge. In addition, SMAVIA Viewer is automatically saved as portable version together with the backup if the footage is exported directly from a recording system to a CD/DVD/USB flash drive. With the identical range of functions, the portable version allows for a direct start without previous installation and without leaving files, settings or registry entries on the PC.

Data Overlays

Displayed information (camera name, time, and data of external systems such as cash registers or automatic teller machines) are displayed throughout the evaluation of the backup. Thus, a preservation of the full information content is guaranteed even for later points in time and without reference to Dallmeier systems.

LGC Forensics Compliance

SMAVIA Viewer makes no changes whatsoever to the footage during the evaluation process. The backups of recording systems with a LGC Forensics certificate are still consistent with the requirements for visual material that can be used as evidence in court.

Features

- Playback and evaluation of backups
- Available as installable and portable version
- Full HDTV with 16:9 display format
- Extensive search functions
- Compatible with SMAVIA Appliances
- Compatible with recording systems of generation 4
- Compatible with recording systems of generation 3
- Display of data overlays
- User interface in German, English, Spanish, French and Italian

System Requirements

- Microsoft Windows¹⁾ 10 (64 / 32 Bit) operating system
- Microsoft Windows 7 (32 Bit) operating system
- Min. QuadCore 2,66 GHz
- Min. 2 GB RAM DDR3
- Min. Graphics card with 64 MB RAM
- Min. 200 MB of storage capacity
