

# 515R1

## Product Specification

### Description: 515R1 15-Position Card Rack with Power Supply

#### Features

- ✓ 15 1-Inch card slots
- ✓ Enhanced thermal dynamics
- ✓ Built-in 6-amp power supply
- ✓ Universal 100-240 V, 60/50 Hz input
- ✓ Accepts redundant PS
- ✓ Fiber fail and output level alarms
- ✓ Sonalert with mute switch
- ✓ Cards are hot-swappable
- ✓ Forever Warranty™

#### Description

The compact 515R1 Card Cage Rack provides high-density racking for Fiber Options fiber-optic modules. It is designed to mount in standard 19-inch (483 mm) instrument racks. Fiber Options rack cards come in module widths of 1, 2, or 3 inches, and the 515R1 can accommodate the equivalent of 15 1-inch modules. The 515R1 is supplied with the 515PS1 power supply, which is designed to supply power to a full 515R1 Card Cage Rack. It has a maximum output of 6.0 A. The 515PS1 can accept any AC voltage input between 100 and 240 V, 60/50 Hz. The input circuit includes an RFI filter. A bicolor red/green LED glows green when DC power output is within acceptable limits. A fiber-fail alarm is also built into the power supply. It is functional only when the rack contains receiver units with the alarm feature. It is activated when the optical signal input to any receiver mounted in the rack is lost. The alarm activates a buzzer built into the power supply, an ALARM LED on the front panel, and relay contacts with connections on the rear panel of the power

*continued*

#### Basic Model Descriptions

- 515R1** 15-Position high-density card cage rack
- 515PS1** Internal DC power supply for 517R1 or 515R1 racks

## MODEL 515R1

### Description (continued)

supply. This output may be connected to a remote device such as a lamp or buzzer. The output contacts may be set to act as dry contacts or may be set to output 14 VDC to power an external device. The built-in buzzer may be disabled with the MUTE switch mounted on the front of the power supply. The output contacts are normally open (NO) dry contacts.

If a redundant power supply is required, a second 515PS1 can be ordered. It is normally installed alongside the existing supply. Switchover from primary to redundant supply is automatic. See Note 2.

**NOTE 1:** When configuring a rack system, it is important to make sure that the power requirements of the

fiber-optic modules do not exceed the output of the 515PS1. This can be determined in one of two ways:

1. Add up the current requirements of all the cards that are going into the rack. The total current requirement must not exceed 6.0 A.

2. Add up the Power Factors of all the cards that are going into the rack.. The total must not exceed PF48, the Power Factor of the 515PS1.

**NOTE 2:** If a redundant supply is installed, note that the cage must be configured so that the total current requirement or Power Factor of the installed units does not exceed the capacity of a single power supply.

### The Power Factor

The Power Factor has been developed as an aid in determining what combination of rack modules can be supported by a specific model of rack power supply.

To use it, add up the numbers in the Power Factor column of the Fiber Finder. The total for a given rack must be less than or equal to the rack power supply Power Factor.

TABLE 1: CURRENT/POWER FACTOR VALUES

Current	Power Factor	Current	Power Factor
0 - 125 mA	1	751 - 875 mA	7
126 - 250 mA	2	876 - 1000 mA	8
251 - 375 mA	3	1.001 - 1.125 A	9
376 - 500 mA	4	1.126 - 1.250 A	10
501 - 625 mA	5	1.251 - 1.375 A	11
626 - 750 mA	6	1.376 - 1.500 A	12

### Power Factor Examples

#### Example 1:

You want to install a number of 700V receivers in a 515R1 rack. The rack will hold up to 15 700V receivers and one 515PS1.

The 700V power factor is PF 1.

$15 \times \text{PF } 1 = \text{PF } 15$ , the total power required by the receivers.

515PS1 = PF 48, so the 515PS1 has plenty of power to spare for these receivers.

#### Example 2:

You want to mount 730DV receivers in a 515R1 rack. The 730DV is a single (1-inch) module. How many 730DV modules can the 515PS1 support?

The 730DV power factor is PF 6.

515PS1 = PF 48.

$48/6 = 8$  There is enough power to support eight 730DV receivers. There will be 5 unused slots.

# MODEL 515R1

## TECHNICAL INFORMATION

### ELECTRICAL - Power Supply

Input Voltage:	100 - 240 VAC	Output Voltage:	13.5 VDC
Input Power		Output Current:	6.0 A maximum
Frequency:	60/50 Hz	Fuse Type or Size:	5 X 20 mm, located in a pull-out tray on rear panel
Current Requirement:	0.99 A at 115 VAC 0.49 A at 230 VAC	Fuse Rating:	2.0 A, 250 V
Power Factor:	48		
Power Consumption:	113 VA @ 115 V	Rack Card Replacement:	Cards may be removed and installed without powering-down the card cage (hot swappable).
Power Supply Dissipation:	28 W @ 115 V		
Heat Equivalent*:	1.6 Btu/min 0.4 cal/min.		

\* This represents the conversion of all input power to heat. The actual heat generated will be less.

### MECHANICAL - Power Supply

Dimensions:	Length: 9.90 in (251 mm) Width: 2.0 in (51 mm) Height: 5.25 in (133 mm)	Construction:	Aluminum
Weight:	1.91 lb (0.87 kg)	Finish:	Black semigloss paint
		Mounting Method:	2 Captive screws

### MECHANICAL - Rack

Dimensions:	Height: 5.23 in (133 mm) Width: 19.0 in (483 mm) Depth: 9.86 in (250 mm)	Shipping Volume:	1.0 cu ft (0.028 cu m)
Weight:		Shipping Weight:	7.35 lb (3.33 kg)
Including power supply:	5.35 lb (2.43 kg)	Construction:	Aluminum
Without Power Supply	3.74 lb (1.70 kg)	Finish:	Black semigloss paint
Shipping Dimensions:		Mounting Method:	4 No. 10 screws or metric equivalent for rack mounting
	Height: 7.3 in (185 mm) Width: 11.8 in (300 mm) Depth: 20.0 in. (508 mm)		

### CONTROLS - Power Supply

Power Switch:	Rocker switch on rear panel	14 VDC Output Enable:	Internal jumper
Alarm Mute Switch:	Slide switch on front panel		

### INDICATORS - Power Supply

Output Power:	Bicolor LED Refer to Table 1
Fiber Fail Alarm:	Red LED glows steadily if a fiber failure occurs when one or more receivers with the alarm feature are present in the rack.

### CONNECTORS - Power Supply

Power Input:	Recessed 3-pin IEC 320 male connector. Detachable 3-conductor cable supplied.
Alarm Output:	5-pin detachable screw terminal connector.

### AGENCY COMPLIANCE AND MTBF

Emissions:	FCC Part 15, ICES-003, AS/NZS 3548, EN55022	Safety:	UL1950, CAN/CSA 22.2, NO.950-95, EN60950, IEC950
Immunity:	EN50204 EN61000-4-2, 3, 4, 5, 6, 11	MTBF:	>100,000 hours

**FCC** PART 15  
COMPLIANT

## TECHNICAL INFORMATION

**TABLE 2: DIAGNOSTIC LEDS**

LED Name	Color	Indicated Condition
DC OUTPUT	Green	Indicates good output current level
	Red	Indicates excessive output current level. Turns red above 6 amps.
	Off	Indicates no output power
ALARM	Red	Indicates fiber failure alarm
	Off	Indicates no fiber alarm

**THE FOREVER WARRANTY**

*Fiber Options warrants that, at the time of shipment, the products manufactured by Fiber Options will be free from defects in material and workmanship. Should any defects appear in the product, Fiber Options shall repair or replace the product or supply an equivalent, at its sole discretion. A Return Authorization (RA) number is required to send the unit back in case return is necessary. Return shipments to Fiber Options shall be at the buyer's expense. Fiber Options will return said equipment prepaid via best way.*

*THIS WARRANTY IS THE SOLE WARRANTY OF FIBER OPTIONS WITH RESPECT TO THE PRODUCT AND IS IN LIEU OF AND EXCLUDES ANY AND ALL OTHER EXPRESSED OR IMPLIED WARRANTIES INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PURPOSE. THIS WARRANTY IS THE SOLE REMEDY AVAILABLE FOR ANY CLAIM BASED ON AN ALLEGED DEFECT IN MATERIAL OR WORKMANSHIP WHETHER SUCH CLAIM ARISES IN CONTRACT, NEGLIGENCE, STRICT LIABILITY OR OTHERWISE. FIBER OPTIONS SHALL NOT BE LIABLE IN ANY WAY FOR ANY CONSEQUENTIAL DAMAGE RESULTING FROM ANY DEFECT COVERED BY THIS WARRANTY.*
