DVTel CaseBuilder^{TM} Software

The CaseBuilder Incident Reporting and Management System is an evidence and risk management tool designed to replace paper systems. This software system allows the user to work in real-time thus enabling a more efficient tracking of incidents and events as they occur.

The software can be used alone or as a module of the Latitude Network Video Management System (NVMS)^{TM} 3.5. The tracking of incidents and events using the CaseBuilder features video, still images, text and any type of digital data. Reports can be created from within the Latitude NVMS monitor or from a web browser and can easily be restricted by both user and computer.

The CaseBuilder Incident Reporting and Management System's critical information is protected from server/storage malfunctions and erasure due to human error. The completed reports are stored outside of the Latitude NVMS database along with any video clips, still images, audio, text and other data, so that they can't be overwritten by the Latitude Media Server Archiver. The entire CaseBuilder database is easily backed up.
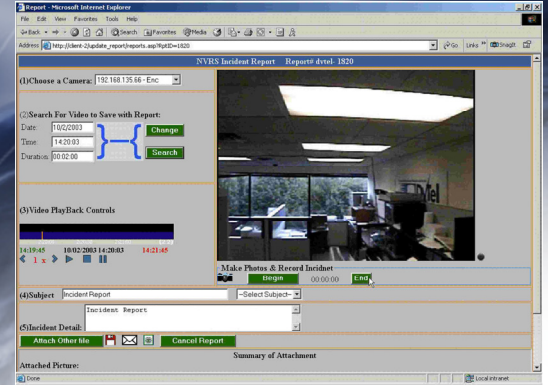

Web based Incident Reporting Software:

- Builds "Case Files" with Archive Video, Photos, Text and other file attachments
- Links to the Latitude NVMS Video Archives
- Saves case files outside of the Latitude NVMS Archives
- Creates browser accessible photo-based log files
- Incident viewer displays video, photos, text and other file attachments
- Tracks un-submitted and deleted reports
- Evidence security—user passwords and permissions

Without CaseBuilder—it's just an Archive

CaseBuilder Archive Log

- Incident reporting and management
- Incident tracking, reporting and analysis
- Statistical reports
- Photographic events log
- Log of reports not submitted, completed and deleted
- Mapping of incident locations
- Intuitive video search and event recording
- Email events with photos
- View reports, logs, video and photos from any browser
- Full Latitude NVMS pop-up event reporting
- Automatic file transfer from Latitude NVMS to CaseBuilder
- Automatic report numbering
- Full CaseBuilder user management
