

Cardax FT Syllabus Plus™ Interface

Cardax FT Syllabus Plus™ Interface is an optional licensed feature available for Cardax FT Command Centre. Cardax FT Syllabus Plus™ Interface provides a flexible interface between Syllabus Plus resource scheduling and Cardax FT.

A significant number of tertiary institutions use resource scheduling systems as the primary tool for creating timetables for all courses. Resource scheduling functionality includes the ability to define specific dates and times that each of the lecture theatres are booked.

Cardax FT provides the ability to define security schedules for all building access control and security. In the tertiary environment the security of a specific room or lecture theatre is often determined by whether a course is scheduled or not.

Interface Solution

Cardax FT Syllabus Plus™ Interface provides a flexible interface between Syllabus Plus™ resource scheduling and Cardax FT. Time tabled resource bookings can be mapped to building access control schedules within Cardax FT.

Importing time tabled resource bookings into Cardax FT Command Centre provides the ability for Cardax FT to automatically perform the following:

- Unlock a specific lecture theatre for the duration of a scheduled booking
- Re-lock the lecture theatre at the conclusion of the booked period
- Automatically activate lighting at a pre-configured time period prior to booking
- Automatically activate air conditioning at a pre-configured time period prior to booking
- Automatically activate projector units at a pre-configured time period prior to booking
- Automatically de-activate lighting, air conditioning and projectors at conclusion of booking.

Benefits of the Resource Scheduling Interface

The key benefits of Cardax FT resource scheduling interfaces, such as Syllabus Plus™, include:

- A single point of entry for resource booking and access schedules
- Timetable changes in the resource scheduling system are automatically reflected in Cardax FT
- Protection of high value assets via increased security for rooms/lecture theatres during unattended times
- Energy savings can be achieved by ensuring that lighting and air conditioning only operate during time tabled course times.

The resulting efficiencies can have a substantial impact on a tertiary institution's operating costs.
