- Presets and tours
- 18 Protocols
- Camera, bracket, PSU and 10 meter cable supplied
- Nudge correction
- Quick Tilt
- WDR
- Mosaic privacy zones

The C-AllView day/night high speed PTZ Camera is a continuous rotation "ruggedised" PTZ camera, sealed to IP67 and designed to be installed in harsh and challenging environments or areas where the camera unit may be liable to experience physical abuse.

The optically flat glass is distortion free giving brighter clearer images at higher zoom ranges and resolutions thus allowing the C-AllView to see further and in more detail than ever before.

The C-AllView PTZ camera has been cast from aluminium, hard anodised and powder coated to protect from scratching, oxidation or attack from solvents, making it vandal resistant and suitable for most applications.

The C-AllView can be mounted inverted, upright or inclined using the Quick Tilt facility, this virtually eliminates any blind spot when mounted in the upright position.

C-AllView makes use of the latest camera module technology and included as standard is a 530TVL high resolution camera with the option to use Wide Dynamic Range (WDR) and mosaic privacy masks.

High Speed Rugged Pan / Tilt Cameras

C-ALLVIEW

The advantages for the installer are obvious: easy to install and simple to set up via a few dip-switches and a comprehensive OSD accessible via any keyboard or matrix on the market today.

Eighteen different protocols (including two up-the-coax) are loaded as standard giving even more flexibility to existing installations without having to order special variants.

The nudge correction feature is there to protect the camera against knock and bumps in incredibly difficult environments. If the camera is forced from its current position or tour it will wait one second then immediately return to the exact position before it was knocked out of alignment without any chance of damage to gears or to the industrial quality stepper motors.

The wiper and optional wash facility on the C-AllView is ideal for all weather conditions. With the remote operation of the wash and optional wipe facility the operator can have clearer images from the comfort of the control room.

The Quick Tilt facility allows the mounting arms to be tilted forward to give a complete 360 degree coverage with minimum blind spots.

Wash/wipe facility enables cleaning of the front glass easily without the need to make a costly maintenance visit ensuring minimum disruption.

Both downward views and upward views are possible making the C-AllView a highly versatile and adaptable solution.

Flat front glass is distortion free enabling crystal clear images even when using 530TVL resolution camera modules and 36x optical zoom ratios.

A PB180 or PB360 bracket can be fitted between the pole or pendant mounting points on the C-Allview to accept the range of CBC vari focal IR illuminators.

Pole or pendant mounting positions are a standard feature of the C-AllView and finish can be in matt black or matt white.
