

# Multiplexer Remote Panel

**ADEMCO Video's AXRC Remote Panel lets you easily expand the control of your video surveillance system, giving operators full remote control of up to 16 multiplexers from a central location.**

The AXRC provides full operational and programming control of each and every multiplexer within the system. A single AXRC is powerful enough to provide switching of up to 256 cameras.

The Remote Panel looks and operates just like the front panel of ADEMCO Video's AX series duplex multiplexers and comes with everything you need for desktop or rack mount use. Additional Remote Panels may be added for control from multiple locations and may be located up to 1000 feet (300m) from the multiplexer(s).

AXRC Remote Panels integrate seamlessly with AKJX8 Advanced Multiplexer/Dome Controllers to provide remote switching locations with or without dome control.

**AXRC**

## **FEATURES:**

### **Remote Panel for Duplex Multiplexers**

- Compatible with ADEMCO Video AX Series duplex multiplexers
- Control up to 16 multiplexers
- Daisy-chain up to 10 remote panels
- Maximum distance is 1000 feet (300m)
- Easy to install and operate from desktop
