HAIDMPROE

INTEGRATED DATA MANAGER PROFESSIONAL EDITION

Honeywell's Integrated Data Manager Professional Edition (IDM ProE) is a cost effective solution for mid to large sized applications that do not require multi-site video/data analysis. Offering many of the same features as IDM Enterprise Edition, IDM ProE allows complete integration of transaction data with corresponding video from Honeywell digital recorders via LAN/WAN or DSL.

Real-time reporting allows IDM ProE to generate fixed reports, customize searches and daily summaries, and create exception reports to pinpoint suspect activity in seconds. Fixed reports allow transaction data to be quickly filtered by specific search criteria. The powerful search feature generates customized reports using criteria such as operator, terminal, description, action code, modifier/amount, time, search type and exceptions. Daily summaries and exceptions may be e-mailed to specified personnel, so that businesses can make timely decisions. IDM ProE automatically highlights exceptions that may be bookmarked for future analysis. Reports can be produced and exported in HTML format for ultimate flexibility.

Market Opportunities

IDM ProE is a cost-effective solution for reducing internal shrinkage due to employee theft, increasing employee productivity and enhancing customer service. Transaction data from cash registers, ATMs, slot machines, weighing bridges, cash counters, online systems and other data sources can be conveniently monitored and stored for data mining, making IDM ProE an ideal solution for a wide variety of retail, food and beverage, financial, gaming and other applications that do not require multi-server connectivity.

Features

- Seamless integration between POS data and surveillance video

- Remote access via LAN/WAN or DSL

- Software solution eliminates installation costs associated with POS monitoring hardware

- Easy-to-use interface for setup and management

- Automatic summaries and exception reports generated and e-mailed to select personnel

- Universal interface – locally or remotely

- Support for InfoGenesis and Micros 8700/9700 POS systems

- Compatibility with Honeywell DVRs and NVRs: Enterprise, Fusion and Rapid Eye™ (as a DVR only)

- Video player allows local and remote creation of video clips with audio

- Real-time transaction reporting

- Backward compatibility with Honeywell and TVS point-of-sale hardware

SPECIFICATIONS

System Requirements	
Operating System	Windows 2000, Windows XP
Computer/Processor	512 MHz or higher Pentium III-compatible CPU
Memory	512 MB minimum of available RAM More memory generally improves responsiveness
Hard Disk	80 GB or higher
Connection	10/100 Ethernet LAN
System Configuration	
Data Storage	Local server to capture and store transaction data; PC, Fusion or Enterprise server
Remote Access	LAN/WAN or DSL

LAN/WAN or DSL	
Digital Video Recorders	Enterprise, Fusion and Rapid Eye (as a DVR only)
Software	InfoGenesis and Micros 8700/9700
Hardware	Compatible with Honeywell and TVS POS hardware
Searchable Fields	
Searches	Server, operator, terminal, text description, action code, modifier/amount, time interval, search type and exception
Exceptions	Type (text/action code), condition and amount
Text	
Display	Side-by-side with video or overlaid using text insertion hardware

IDM User Interface

Ordering	
HAIDMPFPKG	Factory installed IDM ProE software on Fusion DVR to support 1 POS terminal at a server site.
HAIDMPTADDSW	IDM ProE Software License for each additional POS terminal when IDM ProE is factory installed on Fusion DVR. Requires HAIDMPFKG
HAIDMPPKNI	IDM ProE Basic Software License Package when IDM ProE is installed in the field. Supports 1 server site and 1 POS terminal
HAIDMPTADDNI	IDM ProE Software License for each additional POS terminal. Requires HAIDMPPKNI
HAIDMP1YSP	IDM ProE Software Support for 1 Year, per POS terminal
HAIDMCD	CD with 60-day Trial IDM Software. Supports 1 server site, 8 POS terminals, and 2 remote clients
