Deadlocking Motor Lock

Two Models Available

Deadlock or Sashlock combination

Deadbolt Operation

Lock/unlock operation under 0.5 seconds
Adjustable unlock time & auto relock
Motor circuit protected against burnout
Bolt Control - Motor can be operated either by
Normally Open contact or an applied voltage 12-24vAC/DC

Handing

Available LH/RH (reversible)

Electrical Specification

Voltage stabilised 12/24v AC/DC operation Low current consumption - 250mA maximum Connections to controller - plug in terminal blocks 10m connecting cable

Multiple Monitoring

Separate relay monitoring for deadlock/latch & door position - Normally Open 2A@30v AC/DC

Multiple Alarm Output

Separate relay on door held open & deadlock not locked - Normally Open 2A@30v AC/DC

All Models

Reinforced lock case with stainless steel forend with anti tamper fixings.

Hardened deadbolt - 20mm throw

Latch bolt -12mm

Backset - 50mm

Lock case pierced for bolt through furniture. Suitable for use with Scandinavian round/oval cylinders & 8mm square spindle for handle operation

Options

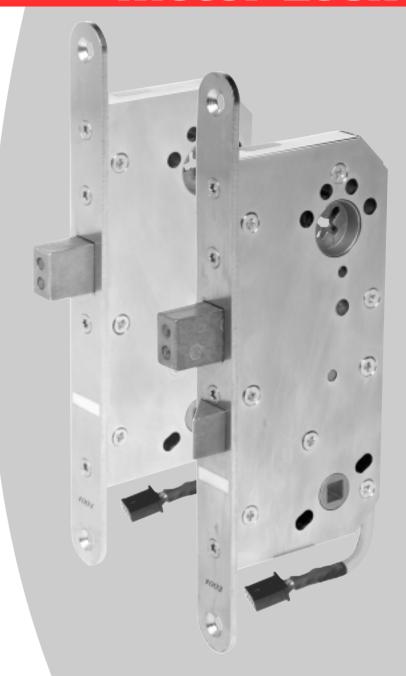

Secure coded models available

Approvals

Exceeds Swedish Security Standard SS3078 (700kg side load pressure & 500kg end load pressure)
CE approved

Patented

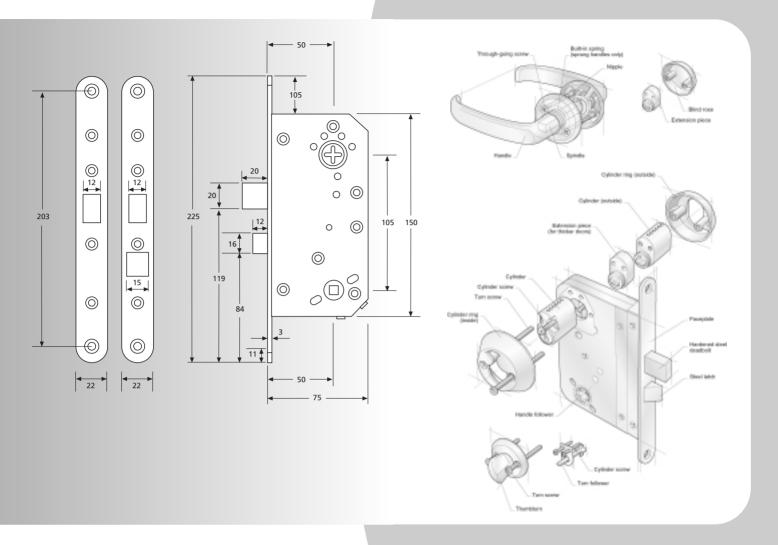

2 year Guarantee

High speed locking and unlocking action of less than 0.5 seconds. Fully monitored in Deadlock or Sashlock combination. Lock case comes complete with Controller and 10m cable.
