- On-Camera Multi Motion Detection Windows
- PSIA & ONVIF Compliant
- Low-Power < 3.8 Watts Power-over-Ethernet
- Two-Way Audio
- Bubble Size 3.8" / 98mm
- -20° to +50° C
- Lightgrabber™ II Low Light Feature
- Digital Image Cropping

### High Performance

Main Profile H.264 offers the most efficient video compression available, resulting in a smooth, high-quality image, low network bandwidth utilization, and reduced storage costs. The Alliance-mx comes in both standard and high definition resolutions with simultaneous H.264 and MJPEG streaming to make future VMS upgrades a snap.

### Exceptional Value

The Alliance-mx series of cameras are perfect for any environment whether indoor, outdoor, or both. It requires less than 3.8W PoE, making the Alliance-mx highly energy-efficient and economical. A 3-13mm varifocal lens enables field-of-view adaptability for a wide range of settings and applications. PSIA and ONVIF compliant API's afford the necessary flexibility to ensure compatibility with any of the most popular VMS platforms.

### Proven Quality

A high-quality, ultra-strong polycarbonate bubble and powder-coated aluminum body combine to make the Alliance-mx domes vandal resistant while being aesthetically pleasing in any scenario. The IP66 rating means you can install the camera just about anywhere. The platform is based on industry-hardened firmware with a common look and feel that existing users know well and new users will be able to learn quickly.

## CUSTOMIZED CONFIGURATIONS
