

Luxriot Broadcast Server

Luxriot Broadcast Server is an integral part of Luxriot VMS suite. Its sole purpose is to deliver live and/or recorded video streams in a platform independent format without exposing VMS server(s) and camera(s) to the desktop and mobile devices including IE, Chrome, FireFox, Opera, Safari, iOS, Android, etc. Luxriot Broadcast resamples and recompresses original video streams for the best performance, quality and bandwidth utilization.

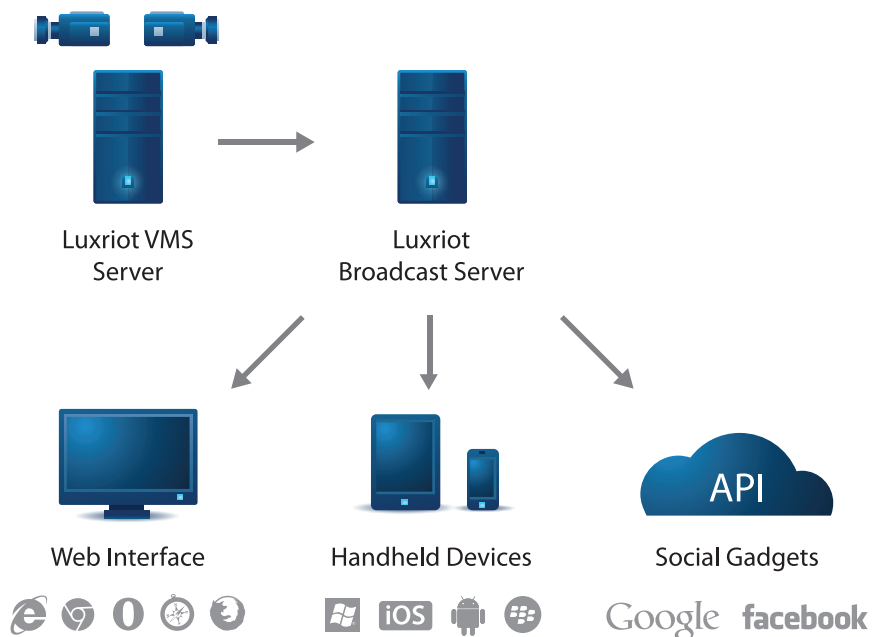

Key Features:

- HTML5
- Rich web application
- Support for mobile platforms including Android, iOS, Windows Phone, BlackBerry OS 7+
- Support of all popular Desktop browsers including IE, Chrome, FireFox, Opera, Safari
- Smart bandwidth control for optimal performance on mobile devices

Luxriot Broadcast Server Features:

- Access to video from web and mobile clients
- Access to server archives from web and mobile clients
- Control of PTZ devices from web and mobile clients
- Separate interface for Desktop and mobile devices
- Mobile devices interface allowing friendly touch screen environment
- Share your Broadcast video over the internet via HTML or Direct Link
- Compatible with Social Media Gadgets (Google, Facebook, etc)
- Resample and recompress video depending on connection speed and viewing capabilities
- Intuitive and user friendly design
- Extensive user permissions control
