eyesite™ PRO
for Windows®

Comprehensive software that adds recording, multiple site viewing and a host of other features to the popular eyesite™ for Windows® program.

- Simultaneous full color motion video from multiple remote sites
- View live video footage, record streaming video to hard disk and save snapshots
- E-mail notification of events
- Remote pan, tilt, and zoom camera controls
- Portable - use on PC or Laptop
- Supports PSTN and IP transmission
- Auto-record upon receipt of an incoming call

See and hear what you're missing…
Now you can check on your premises from your office, home or anywhere in the world without the expense of dedicated equipment.
eyesite for windows Pro provides an advanced, portable and effective tool for remote viewing, visual alarm verification, video storage and retrieval of events as they happen.

Performance every time
eyesite for windows Pro delivers outstanding picture quality over low and high bandwidth. Advanced audio decoding complements video to ensure full comprehension of events at the remote site.

Affordability through synergy
eyesite for windows Pro uses the modem or network connection of the PC and its inherent processing power. When paired with an eyesite110 or 140 an extremely cost effective solution results.

Monitor hundreds of different sites
With an easy to use dial list handling PSTN and IP connections, and containing information on different camera views, available bandwidth (for IP), passwords, and site names for over 100 different sites, *eyesite for windows Pro* can grow with your monitoring requirements.

Simultaneusly view several remote sites
eyesite for windows Pro can display video from several remote sites simultaneously. The user can size, scale, pan, tilt, zoom, and record the images as desired increasing the productivity of the person monitoring the site.

Record to hard disk
eyesite for windows Pro allows continuous video and audio recording. At full quality it records at a rate of 100kb per minute, corresponding to a weeks storage on a 10GB hard drive, or 2 DVDs for a week.
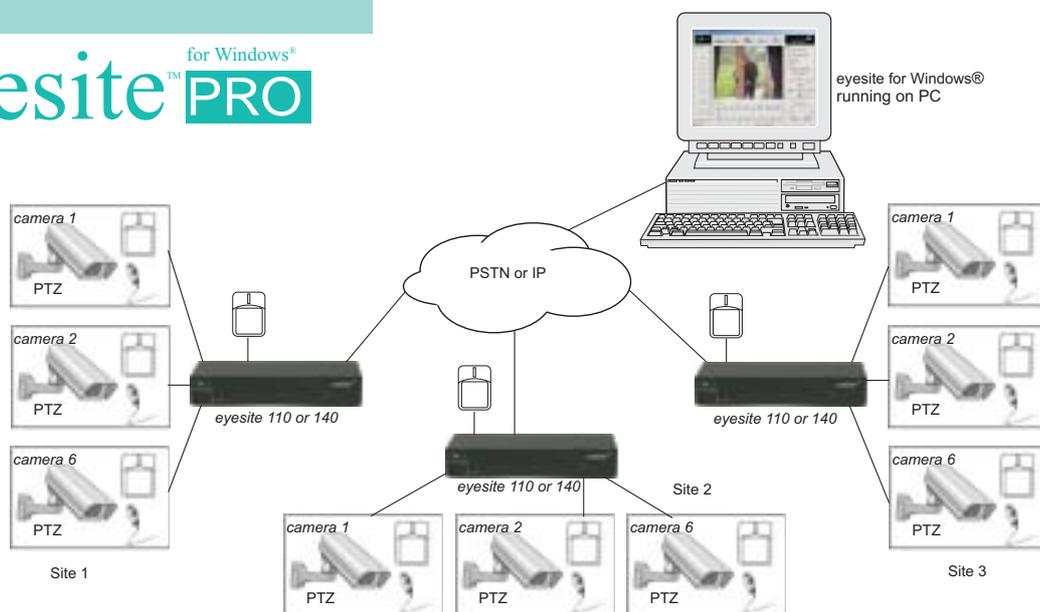

E-mail event notification
eyesite for windows Pro can be configured to send e-mail notification on alarm events. In this way it can be left to monitor or record events at remote sites, e-mailing you when your attention is necessary.

Technical specifications

System requirements
- Windows® 98, 2000, XP, NT or ME
- Pentium 2 processor or above
- 64MB RAM memory
- 16MB free disk space
- Sound Card
- CD ROM Drive
- V.80 compatible modem for PSTN
- 802.3 compatible network card for IP operation
- Direct X v 8.0 or higher
- Microsoft® Outlook for e-mail notification

Industry Recommendations Supported
- ITU-T H.324
- Video: H.263
- Audio: G.723
- Control Protocols: H.245
- Multiplexing
  - PSTN: H.223
  - IP: Motion Media TPB

Format
- CD ROM with online help and quick start guide

Companion products
- eyesite™110
- eyesite™140

Video
- PC Video Format: VGA, SVGA, XGA

Video Window Size
- CIF: 352 x 288 pixels
- QCIF: 76 x 144 pixels

Frame rate
- PSTN CIF 7fps, QCIF 15fps
- IP CIF, 15fps, QCIF, 30fps

Audio
- Receive audio monitoring of remote site via sound card

Network
- PSTN - via modem card (see website for range of supported modem cards)
- IP - via network card

Demographics
- Naming of individual cameras and locations

E-mail notification
- e-mail contains: user name, serial unit number, start/end times, phone no, and call duration

Software features

Recording
- Saved in H.263 format
- File management - can record multiple clips into the same file or in multiple files

Snapshots
- 16 simultaneous pictures
- Facility to save in Windows bitmap (.BMP) format
- Enhanced snapshot picture quality
- Approx 300kB per image (CIF)

PTZ Camera control (Pan, Tilt, Zoom)
- GUI with 9 presets per camera
- PTZ cameras supported*
  Sony; E-Line; Panasonic; Kalatel; Pelco

Security Features
- Secure PIN access
- Individually configurable for remote sites

Connect Options
- 100 number dial list supporting PSTN numbers and IP addresses
- Remote site name and location
- Configurable PIN for each connection

*Requires eyesite110 or 140
