eyesite for windows

Easy to use software adds flexibility and practicality to eyesite 110 and 140 remote video products.

- Full colour motion video and audio from remote sites
- View live video and save snapshots
- Remote pan, tilt, and zoom controls
- Portable - use on PC or Laptop
- Supports PSTN and IP transmission

See & hear what you're missing…

Now you can check on your premises from the office, home or anywhere in the world without the expense of dedicated equipment, eyesite for windows provides an simple, portable and effective tool for remote viewing and alarm verification.

Performance Every Time

eyesite for windows captures fluid movement and delivers clean, clear picture quality. Advanced audio decoding complements video to ensure full comprehension of events at the remote site.

Affordability through Synergy

eyesite for windows uses the modem or network connection of your PC and its inherent processing power. When paired with an eyesite 110 or 140, an extremely cost-effective solution results.

Wide Compatibility

eyesite for windows is compatible with Windows XP, 2000, ME, NT and 98 systems. It supports H.324 and can be used in conjunction with standards-compliant third-party devices. eyesite for windows also supports a wide range of remote PTZ cameras.

Supports Multiple Remote Sites

eyesite for windows can be configured to dial to fifty different sites and to receive incoming calls for visual intruder verification.

Capture & Save Snapshots

Simple drag-and-drop control allows you to take multiple snapshots of events, then review, share and save them to your PC.
