

single door access controllers
multiqey and complus ranges

Multiqey range

The Multiqey series from m r access offers the most flexible and lowest cost solution for single door access controllers yet devised. Using Multiqey products enhances the flexibility and security of magnetic card entry, each suited to specific applications.

Higher security

Multiqey offers a higher level of security and usability, not normally associated with similar devices. This is achieved by all database locations being accessible individually to the Security Manager by means of 'Location Cards'. Using this facility, cards may be deleted, even when the original cards, or copies, are not available.

- Range of cost-effective magstripe based single door controllers
- Easy to install, programme and use
- External or internal operation
- Up to 1,000 users (Bank lobby version also available)
- Accepts any ISO Track 2 format cards
- LED indication
- RS232 output for connection to printer or computer if required
- Available in Standard and Customer specific kit form

Multiqey Range

The Multiqey range is ideally suited to applications in offices, blocks of flats, private car parks and store rooms.

MQBANK for bank access

This is a special version of Multiqey that is ideal for bank lobby applications since it is configured to validate only the first four digits on each card, normally used to define the bank, thus controlling access to authorised users.

Multiqey kit

- Everything to install a Multiqey controller
- Multiqey + 50 user and location cards
- Power supply
- Electric strike
- Connector box
- Exit switch
- Screws and clips

Complus range

Card and PIN Single Door Access Controllers

Complus is a range of access control systems which combine the intelligence of the m r access Multikey single door access controllers with the added security of a vandal resistant 3x4 PIN keypad.

- A range of cost effective single door controllers
- Magstripe or magstripe + PIN (for added security)
- Easy to install, programme and use
- External or internal operation
- Up to 4,000 users
- Duress function
- Led and bigger indicators
- Tamper, local and remote alarm functions
- Stores last 3,000 transactions
- RS 232 output for connection to printer or computer if required
- Customer specific kits available

Complus supports up to 4,000 users and in addition to the magnetic card swipe and PIN entry, time zoning is included as an additional security measure. Access conditions can be programmed by the user to be card only, card and PIN, PIN only or free access controlled by a clock.

Complus may be used for internal or external applications and will operate over the temperature range of -10°C to $+55^{\circ}\text{C}$.

Housed within a rugged metal case measuring 156x113x39 mm Complus is simple to install since all connections are made via a single multiway cable. Due to the design of the unit power may be either ac or dc over the range 11 to 16V, making it compatible with the power requirements of most associated equipment.

Complus is fully supported with a range of high quality user cards. Complus also accepts standard ISO Track 2 cards, therefore cards from existing sites may be used.

Complus-2

A basic controller that meets the requirements of the vast majority of access control applications.

- Two access levels – card or card + PIN
- No time zones

Complus-5T

An enhanced controller offering additional access levels and time zones, for applications requiring a higher degree of security

- Five access levels – based upon magstripe cards and PIN's
- Sixteen time zones

Ancillary equipment

m r access offers a range of ancillary equipment to meet customers every need these include:-

- Power supplies
- Electric strikes
- Exit switches
- Magstripe readers and cards
- Proximity readers and cards
- Connector boxes etc.

About us

m r access is a member of the UK-based m r sentire group having principle interests in the high technology access control market.

m r access have recently become UK distributors of Motorola Smartcard solutions. A truly global combination.

Among the group companies is Uniqey, the inventor of hotel electronic locking systems, and today one of the world leaders in their field.
