

## TOUCHLOCK K series keypads

Use with Switch2 or Net2

Supplied with a choice of black or white bezels

3 sizes

Low profile - less than 16mm deep

Easy mounting

IP67 rated - suitable for external use

### About

K series keypads are for use with Switch2 and Net2 systems. The keypads are supplied with a choice of black or white bezels. Additional colours are available as shown in the illustration below. Replacement bezels are available to Paxton registered installers free of charge. K series keypads are available in three sizes.

### Installation

The keypad is wired as shown on the control unit label. The cable exits centrally from the back of the keypad making drilling and mounting very accurate.

### About

A code is entered using the keypad. The control unit checks the validity of the code and grants or denies access as appropriate.
