

Application of VioStor NVR Series: VMobile for iPad/iPhone/iPod Touch

Experience a Truly Secure Network Surveillance Solution on Your iPad, iPhone, iPod Touch!

VMobile is a mobile video surveillance application provided by QNAP for remote and wireless monitoring of IP cameras and video playback by connecting to VioStor NVR through your iPad, iPhone, or iPod Touch. As long as you have network access, you can connect to and manage your video surveillance system anytime, anywhere.

VMobile supports monitoring of unlimited servers/channels from hundreds of network cameras of different brands by simple connecting to any available VioStor NVR on the network. The application supports advanced monitoring features, such as adjustable display mode, PTZ and preset position control, instant notification of alarm events, and snapshot. You can also playback the recording data from different monitoring channels and by different alarm events.

For more information about the supported cameras of VMobile, please visit http://www.qnapsecurity.com/pro_compatibility_camera.asp.
