

MaxiMate™

Easier, Faster and Friendlier
Access Control Solution

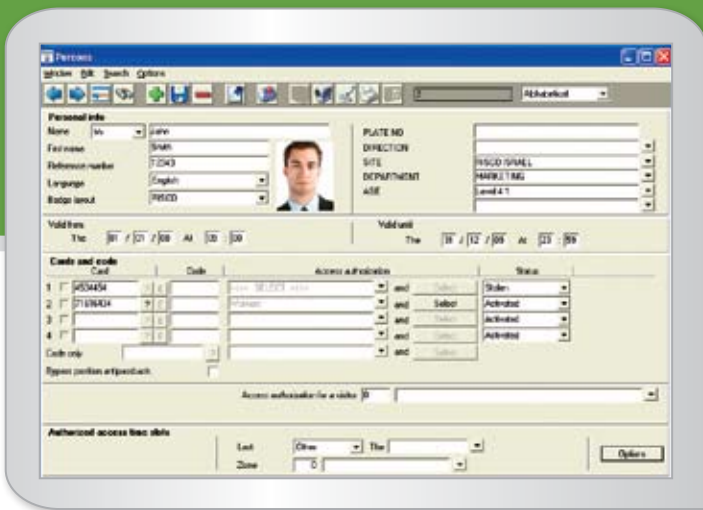

Introducing MaxiMate™

RISCO Group's new MaxiMate™ Access Control Solution gives users the flexibility to manage the level of security and functionality based on their needs. MaxiMate™ is extremely adaptable, easy to operate, fast and user-friendly and offers simple installation and programming.

MaxiMate™ can control up to 16 doors and 7,800 cards, using any cabling topology, whether it be bus (loop or star), IP or any combination of these. This enables a cost effective installation and provides a special advantage for retrofits - as any existing cabling in the building can be used saving, time and rewiring costs.

Access Control Solutions

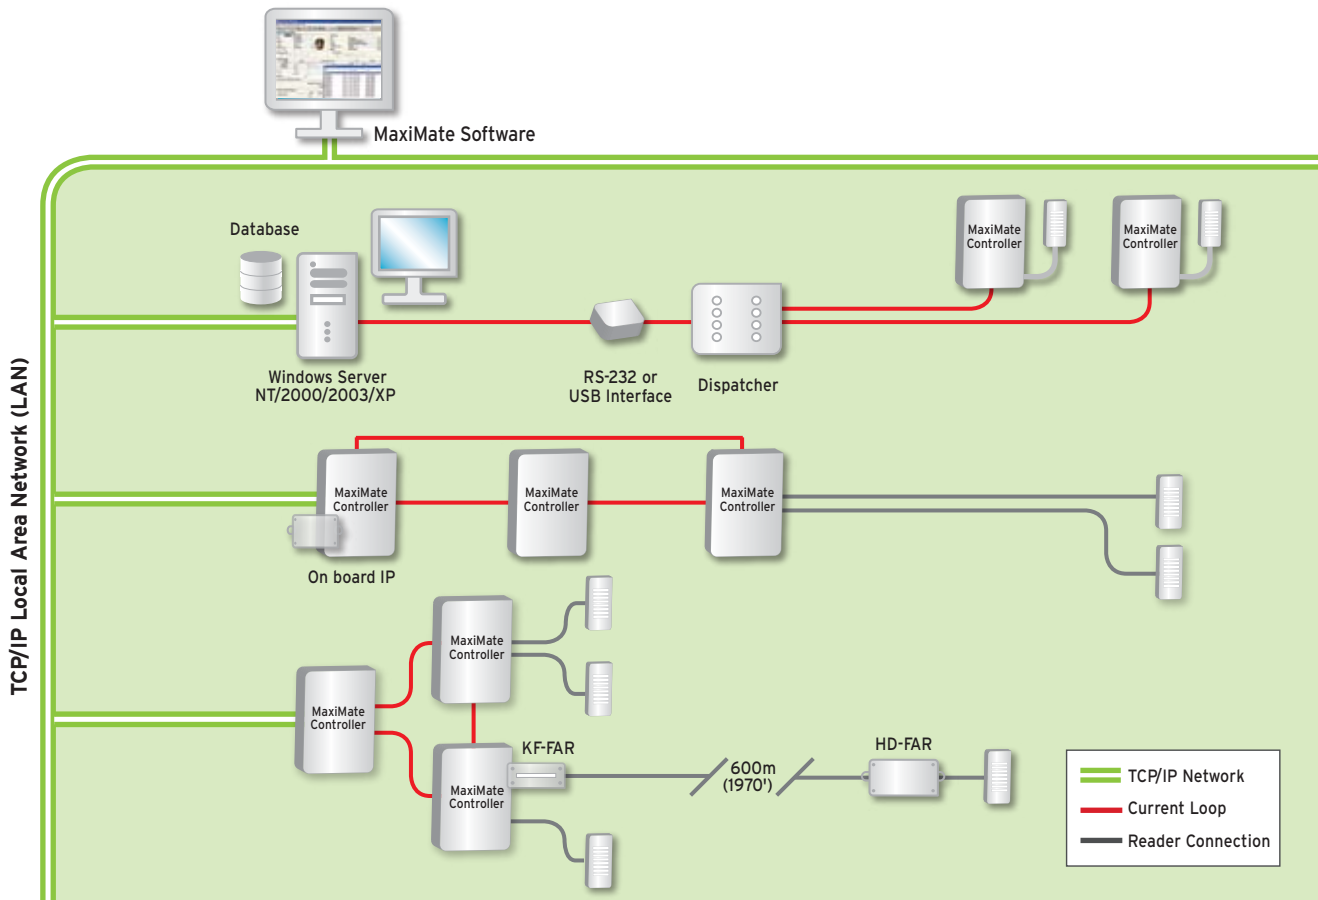

MaxiMate™ Professional Software

MaxiMate™ software is a fast, simple and reliable tool for managing access authorization, employee presence and additional events in real-time. Events can be associated with specific sounds and colours, and event reports can be saved and printed out.

ACMXMATE000A | MaxiMate Software

Features and Benefits:

- Control access at doorways, turnstiles, rotary door, gates etc.
- Simple installation and intuitive interface
- Manages up to 16 doors and up to 7,800 cards per controller
- Global anti-passback / anti-timeback
- Calendar per card for easy project setup
- Multiple cards per user
- Predefined set of reports:
 - List of persons
 - List of readers
 - List of absents
 - List of persons by door and more....
- Secure access to information - controlled per individual user

MaxiMate™ Controller

MaxiMate™ Controller provides extra reliability as it saves all the information needed to manage the doors independently in its memory. MaxiMate™ offers modular flexibility for easy expansion and scalable functionality upgrades.

Features and Benefits:

- Manages 2 double doors, 7,800 cards and 2,500 events - per MaxiMate™ Controller
- 2 relays, 4 readers and 8 inputs - per MaxiMate™ Controller
- Embedded unique controller address allowing event buffer Plug & Play functionality
- Secured PC interface (USB, RS232, TCP/IP)
- Protected inputs and communication lines
- 220V and 12V backup battery monitoring and event reporting

ACR7MATEB00A | MaxiMate Controller with box & power supply

MaxiMate™ Accessories:

TCP/IP Digi R7 Internal

The TCP/IP Digi is a communication module that plugs into the MaxiMate™ Controller, enabling TCP/IP communication between the controller and the background tasking application.

ACIPR7DIGINA | TCP/IP Digi R7 Internal

Dispatcher

The Dispatcher is a connection hub for 8 MaxiMate™ current loops. The Dispatcher enables controller loops to be brought into use or taken out of service in a simple manner with straightforward switches, and is recommended for all installations with more than 4 controllers.

ACD8B2A0000A | Dispatcher 8 Channels in Box with Power Supply

HD-FAR with Box

The HD-FAR with Box extends the distance between Controller and Reader up to 600m (1970'), and is used in conjunction with a KF-FAR located in the MaxiMate™ Controller.

ACHDFARBOXOA | HD-FAR with Box

HD-FAR PCB

The HD-FAR PCB is useful when it can be installed in the power supply of the reader.

ACHDFARPCBOA | HD-FAR PCB

KF-FAR PCB

The KF-FAR PCB is installed in the MaxiMate™ Controller, and works in conjunction with the HD-FAR, for extending the distance between the Reader and the Controller up to 600m (1970').

ACKFFARPCBOA | KF-FAR PCB

Enrolling Reader for PC

The Enrolling Reader is used to easily enroll cards in the system and is mandatory when numbers are not printed on the cards. When a visitor exits, all the card access rights can be automatically cancelled by presenting the card to the Enrolling Reader at the reception desk.

ACREN232000A | Enrolling Reader for PC

PC-USB / PC-RS232 Interfaces

The PC-USB and PC-RS232 interfaces enable communication between a PC-USB or RS232 port to one or more MaxiMate™ Controllers located on a loop. Each interface added creates an additional loop of controllers thus extending the total number of devices managed by MaxiMate™ software.

ACIPCUSBINTA | PC-USB Interface

ACIPCRS2325A | PC-RS232 Interface

Access Control Solutions by RISCO Group

In addition to MaxiMate™, RISCO Group offers a full Access Control solution supporting up to 22,000 cards per controller, a virtually unlimited number of users, up to 4,000 doors and a 2,500 event buffer per controller, capable of handling hundreds of thousands of events per day.

Among other things, RISCO Group's Access Control solution has multi-site support and filtering, distributed intelligence, real time communication with customer process, zone management, flow control and crisis mode, extensive tool box and more...

The Access Control range is integrated with RISCO Group's SynopSYS Integrated Security & Building Management Software. SynopSYS is a landmark development in integrated security and building management, providing simplified and completely integrated site management. Employing state-of-the-art technology, SynopSYS combines security, fire detection, video monitoring, access control, HVAC and other building automation systems into a single management system.

Access Control Integration with SynopSYS enables:

- Graphic display of all building's areas and doors
- Performing Access Control actions such as opening doors remotely
- Real-Time monitoring of all Access Control events
- Customizable triggering of actions when specific events occur, such as camera pop-up when unauthorized entry occurs, or pop-up of employee's photo when entering the premises

Creating Security Solutions.
With Care.
