Data Sheet

High-speed backup for your digital life on your computer, mobile devices and the cloud

The Seagate® Backup Plus Fast portable drive offers up to 2× the capacity and performance compared to other 2.5-inch portable drives. The metal design protects 4TB of storage, so you can carry your movie, music and photo collection wherever you go. The drive also optimizes the speed of the fast USB 3.0 interface with transfer speeds up to 220MB/s—giving you the ability to quickly transfer files, and work on graphic or video projects directly from the drive.

The drive is fully USB powered and does not require an external power supply—allowing you to carry as many videos, songs and photos as in a 3.5-inch drive in this compact portable drive. Install the NTFS driver for Mac®, and you can use the drive interchangeably between Windows and Mac computers without having to reformat.

Via the Seagate Dashboard software, you are provided with tools for local, mobile, cloud and social media backup. Run a one-click backup or schedule an automatic backup plan to protect your files in your Backup Plus Fast portable drive at your convenience. Install the free Seagate Mobile Backup app on an iOS or Android mobile device to back up all of the pictures and videos from the device to your external drive or the cloud.

The Backup Plus Fast portable drive includes 200GB of cloud storage with OneDrive® for 2 years for added protection and on-the-go access for your most important files.[1] Back up to the cloud using the OneDrive client or Seagate Dashboard. Additional cloud connectivity is available for Google Drive and Dropbox, as well as social media backup for your Facebook and Flickr accounts.

For your videos and photos, the Lyve app recognizes your Backup Plus drive as a go-to photo and video destination. Free up your phone's memory by off-loading files to your drive, and you can access them anywhere in a single, organized library on the Lyve mobile and desktop apps.

1 OneDrive service available for 2 years after activation. Must be activated by June 30, 2017. May not be available in all countries.
