UNIVERSAL OBSERVATION SYSTEMS - REMOTE SENTINEL

Simply plug the Remote Sentinel into a telephone socket and provide power, and you can view your home or business from anywhere in the world. The stylish, unobtrusive dome fits well into any surroundings and offers unparalleled remote monitoring capabilities. Simply switch it on as you would an answering machine before leaving your home or office.

View you property while away on business, on holiday and even from the golf course. Just use your portable, handheld or palm PC to dial in from your mobile phone or land-line and instantly receive live images from the full colour camera. No need for your neighbours to keep an eye on your home - do it yourself from the comfort of your deck chair.

Supplied with user-friendly Windows CE software, Remote Sentinel is the low-cost, easy to use solution for remote surveillance monitoring.
