## Description

The Siquira® HSD620 is an indoor High Speed PTZ dome camera with exceptional imaging controls to provide excellent pictures even in the most difficult circumstances.

### Multi-stream / Multi-codec

The versatile HSD620 can simultaneously stream H.264, dual MPEG-4, and MJPEG. Each stream is optimized for its specific purpose. The H.264 implementation uses dedicated hardware to improve video quality while lowering bandwidth requirements.

### Open Streaming Architecture (OSA)

The HSD620 complies with worldwide approved standards for streaming video and is tested with different vendors, making third-party integration easy. Its OSA offers standardized streaming video and remote control. The HSD620 also supports the unique Siquira® MX™ protocol.

### High-Speed Dome

This high-speed PTZ dome has a 26x autofocus zoom lens and 12x digital zoom. The lens can move in almost any direction offering a wide view without missing any details. Precise 400° per second pan and tilt drive technology offers almost instant preset positioning.

### Day/Night, Backlight Compensation, and Wide Dynamic Range

The HSD620 provides automatic day/night functionality, for use in low light situations. Backlight Compensation enhances image visibility in difficult lighting situations. This ensures quality pictures at all times.

### Audio, I/O Contacts and Analog Output

The HSD620 combines streaming video with duplex audio and I/O contacts over IP and balanced audio inputs/outputs suitable for all industrial audio systems. With its analog output, the hybrid HSD620 solution can provide local video for a public view monitor or local DVR.

### Fiber Interface Accessory

A fiber option is available for direct connection of fiber to the dome via a flexible SFP interface. The XSNet™ range of SFP modules, with options for both single mode and multimode are available. The SFP interface is built into the dome itself so a wide range of mounting options are available.
