CyberTeleEye / Web Video Solution

Add Video. Online!
Your web page comes alive!

CyberTeleEye Web Video Solution is a flexible development tool to create, build and manage live video on users' existing web pages. Users can use its Video Page Generator to add video icon onto their current web pages. Just click. Video will come on your screen in either pop-up or on-screen window styles. It works well with other popular web development tools to create web video applications.

To facilitate management and security control, the Video Page Generator helps to build up video user account systems. Web administrator can assign different authorization levels to different persons and manage their access to locations or cameras.

CyberTeleEye Video Server can tremendously increase the number of concurrent users. It receives videos from up to 4 TeleEye video transmitters and distributes them to numerous Internet users at the same time. Its scalable architecture allows flexible capacity expansion by cascading a number of video servers.

Applications:
- Property Management
- Traffic Monitoring
- Intelligent Home/Facilities Management
- Live Events Broadcasting
- Tourist Attraction
- Business Promotion
