## TruPortal<sup>™</sup> Access Control

2-Door Base System

#### **OVERVIEW**

TruPortal offers an IP Appliance-Based Access Control System integrated with the TruVision® line of video products that is designed for small- to medium-sized commercial buildings. The easy-to-install system features a browserbased interface that does not require specialized training, additional software or licensing. A companion iPad® app enables users to remotely monitor system activity and perform basic administrative tasks, such as adding or deleting users. Plus, mobile users of the native iPhone® or Android phone application can perform the most common command and control functions including video, reports and door commands directly from their phone.

A user-friendly interface, online help files, built-in tool tips, intuitive searching and flexible reporting methods all ensure a frustration-free user experience. Analog and IP video is provided via integration with the TruVision line allowing for in-browser video verification and alarm tagging.

End-user administration of the system is made easy with built-in wizards that guide the administrator through the different setup screens, as well as items like Access Levels, Schedules, Holidays and Reader Groups. Multiple levels of operators can be configured, with five levels incorporated by default.
