

ASE5300-AP **Basic HR application programming** **interface (API) license**

SiPass®
integrated

-
- **Enabling third-party applications to communicate with SiPass integrated and exchange common information**
 - **Web-enabled remote operator access**
 - **Create your own unique user interface**

The Basic HR API enables SiPass integrated to communicate with third-party business applications and exchange common information, which significantly reduces the need to enter identical data into multiple systems.

Features

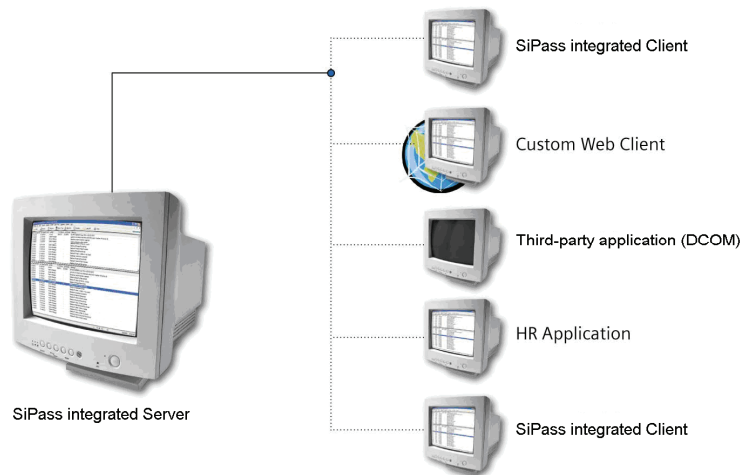

- SiPass integrated user name and password required to preserve the integrity of sensitive data
- Interface with any DCOM application that supports automation such as VB, C++, Delphi, Java, etc.
- Bi-directional data flow
- HR API events fully logged to audit trail
- SiPass integrated operator privilege levels (view, edit, delete) apply to external application
- Can access SiPass integrated cardholder data through a Web browser or HR application
- Assign access privileges to cardholders and visitors

Benefits

The operator partitioning security feature in SiPass integrated continues to apply to data accessed through the Basic HR API, ensuring that only operators with a valid user name, password and appropriate database privileges can modify and add cardholder data, no matter how they log in.

All necessary cardholder data fields are accessible, access privileges can be assigned to cardholders and visitors, and images of up to 30 different graphical formats can be shared, like employee signatures and ID photos.

You can tailor a user interface to match your exact facility requirements, such as linking your day-to-day card management operations to your corporate intranet.

SiPass integrated Integration

Important

Note: To facilitate seamless communication between the Basic HR API and SiPass integrated, a small amount of software development is required for the third-party application. With the aid of the SiPass integrated HR API Development Guide, this task is relatively simple for a software engineer.

System Requirements

One of the following core packages is required:

Type	Part no	Designation
ASL5000-SE	6FL7820-8AA10	SiPass integrated Standard
ASL5000-OA	6FL7820-8AA20	SiPass integrated Optima

Details for ordering

To order the SiPass integrated software extensions, you must first complete a software license order form. Please contact your SiPass integrated supplier for further information.

Type	Part no	Designation
ASE5300-AP	6FL7820-8AE04	Basic HR application programming interface (API) license
