Protective Camera Housing

VANDERBILT

The multi-purpose protective camera housing in Vanderbilt design is made of aluminium and equipped with a sunshield and integrated heater. The housing can accommodate all current Vanderbilt cameras with fixed focus, varifocal or zoom lenses.

The protective housing can either be fixedly installed using one of the available wall brackets or mounted on a pan-and-tilt head. The housing cover is easy to remove, facilitating on-site installation and cabling of the camera with lens.

Key features include:

- Washer/wiper unit available as an option
- Integrated heater to prevent condensation on the front window
- Protection rating IP66 for outdoor use
- Vanderbilt corporate design
