TELEMETRY : KEYBOARDS   **6000 Series Keyboard**

DESCRIPTION

PRODUCT IMAGE

Powered by Molynx telemetry protocol technology, the 6000 Controller Range Series has been designed for use by security staff who operate in busy control rooms. Several features make the 6000 Series unique - an unbreakable trackball instead of joystick for precise camera control, solid rubber keys for precise commands and warning lights in blue instead of the ubiquitous red or green. Up to 32 cameras on 8 screens can be controlled from one controller - eight controllers can be linked together to provide a distributed system of 256 cameras on 64 screens.

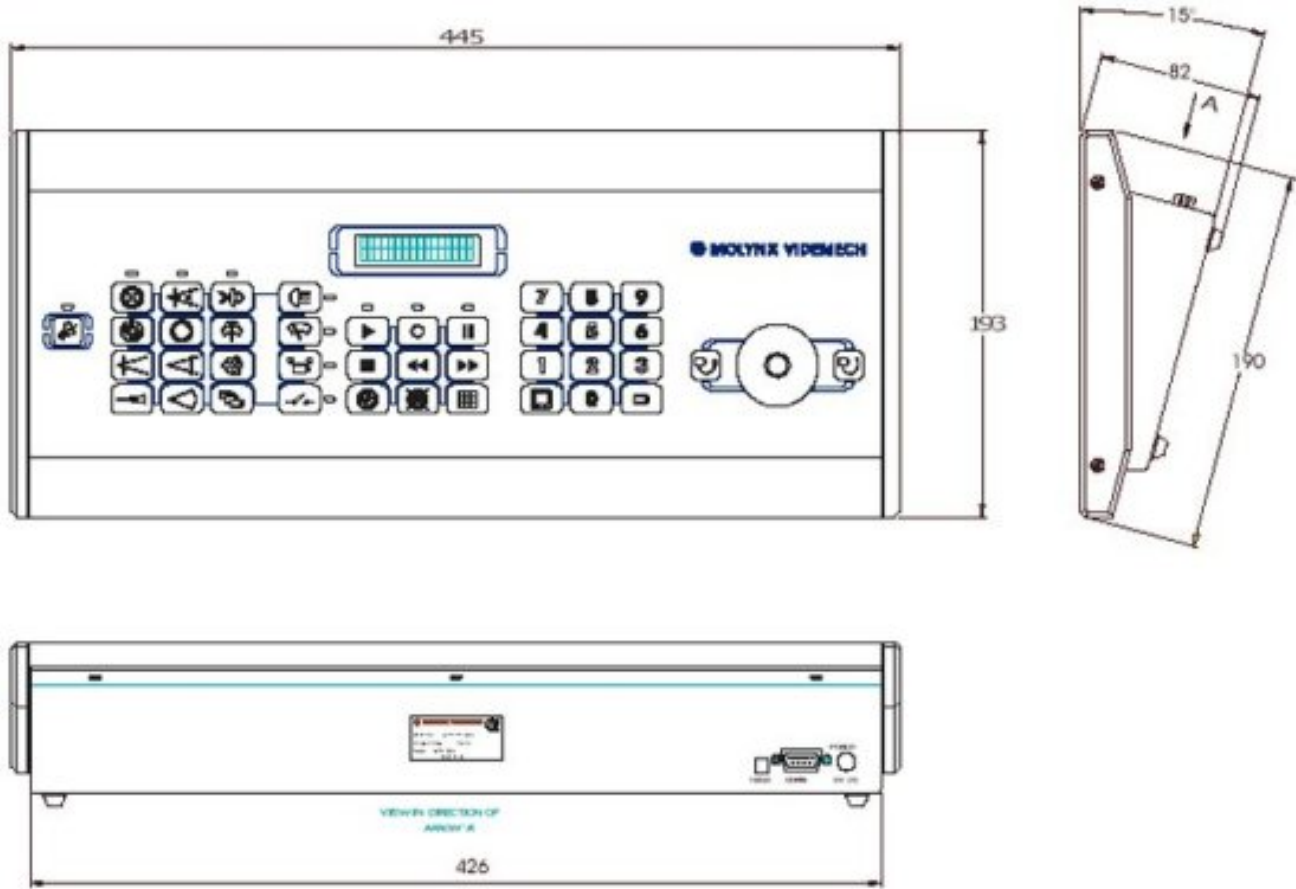

TECHNICAL INFORMATION

Dimensions	445x193x85mm (LWH Approx)	**Humidity**	20% to 80% Non-Condensing
Unit Weight	1.72kg	**Programmable Vid. Seq.**	Yes
Temperature Range	0° C to 40° C		
Environmental	IP30 BS EN 60 529		
Power Consumption	0.3A		
Power Supply	9V DC		
Colour	Pale Grey (RAL7035)		
Variable Speed Control	Yes		
Tour Facility	Yes		

Telemetry	Coax And Twisted Pair	**Expandability**	Supports distributed systems up to 256 x 64
		Trackball Controller	Yes
		Add keyboards	Yes - 8
