W7SW10

SiRoute™

User Tool

for control panel series

- **State of the art software tool for end user**
- **Easy way to manage the Siemens S-Box**
- **Simple to install on a desktop PC or Laptop**

Easy handling. The first developed software tool for managing a Siemens S-Box security system especially for end user.

Simple to install. The User Tool W7SW10 can be installed very easily on desktop PC's or Laptops. Just insert the CD and the auto run program is installed. For managing the Siemens S-Box with the installed user tool, the PC or Laptop has to be connected via a special cable with the Siemens S-Box
