

Nextiva Financial Vid-Center

For Unified Enterprise DVR Viewing

Nextiva™ Financial Vid-Center™ is a unified enterprise DVR interface that provides banking organizations with a more complete view of their operations and an effective and time-saving approach to security and performance.

Video Viewing Simplified

With Vid-Center, security, operations, and other managers can easily scan the most pertinent activities in branches, ATM centers, and other banking facilities. They can view multiple scenes in a single location or any number of branches and physical DVRs, all on a single screen. And they can do all this without having to connect and disconnect from one DVR to the next, over and over again, and without having to visit individual sites.

Compatible with the Nextiva NetDVR™, NetDVR II, microDVR™, and microDVR II solutions, Vid-Center features an intuitive user interface that displays up to 16 independent camera views on a single screen. This versatile video viewing software essentially eradicates the restrictions of conventional video viewing products and makes CCTV systems more effective and user friendly.

User-Defined Zone Views, Virtual DVRs, and Guard Tours

Vid-Center is designed to help managers and executives better address their unique operational objectives. Each authorized user can create virtual DVRs from any number of physical DVRs as though they were one device, and they can establish zone views for up to 16 cameras for viewing or playback.

Key Features

- View video from multiple DVRs and locations
- Intuitive, user-configurable interface, with up to 16 camera views per screen
- User-defined virtual DVRs, DVR groups, zone views, and guard tours
- Locate and view video by related data or zone
- Optional license for multi-site connectivity to remote Verint DVRs
- Compatible with Nextiva NetDVR/NetDVR II and microDVR/microDVR II

Users can also define automatic or manually-operated guard tours tailored to specific locations and operations — bank openings and closings, busy lunch hours, and so on. Plus, they can define and save all of these popular functions quickly and easily with the intuitive Vid-Center user interface. This can significantly reduce administrative overhead and provide executives with a first-hand view of bank activity, whether they are on site or hundreds of miles away.

Industry-Leading Data Interfaces for Faster, More Productive Investigations

Integration with ATM, teller, and other banking systems expedites investigations by enabling fraud and security investigators to rapidly locate video by incident-related data, such as transaction number, by user-defined zone views, or by data in the Vid-Center system, status, and event logs — regardless of the number of locations in which the activity occurred and the number of cameras and physical DVRs involved.

Superior Usability and Manageability

Vid-Center features powerful management capabilities that enhance ease of use and image accessibility. Authorized users can build a database of Verint DVRs for operation and control. Using the Vid-Center control interface, they can name DVRs and program functions for remote connection. They can assign multiple DVRs to groups for more efficient management, a feature that is especially significant when there are hundreds of remote site DVRs to manage. And they can build virtual DVRs to display a more unified and meaningful view of all deployed systems.

Only Nextiva Financial Vid-Center offers all this ...

ZONES	GUARD TOURS
Select popular camera views	Select standard or guard view
Save as a zone for efficient operation	Build tours in Guard Tour Manager
Add additional zones as needed	Automated zone tour function
Multi-site license option	Multi-site license option

Nextiva Financial: A Comprehensive Video Portfolio for the Banking Industry

Vid-Center is part of Nextiva Financial, a comprehensive video management portfolio designed specifically for the banking industry. Built on Verint expertise from thousands of successful deployments, this integrated video portfolio features powerful, embedded DVRs, versatile enterprise video management and viewing applications, and industry-leading, IP-based data interfaces. Nextiva Financial provides executives and managers with the video and data they need for safer, more efficient operations.

Plus, Nextiva Financial is from Verint, the leader in networked video solutions worldwide.
