ViconNet video management software is a high-performance, standards-based open platform solution

Vicon's open-architecture, feature-rich video management software (VMS), ViconNet, is a robust, scalable and incredibly flexible solution that delivers complete access to live and recorded security video across your network. Supporting industry-standard compression and transmission formats, including H.264, ViconNet displays and records clear, high-resolution video while minimizing bandwidth and storage requirements.

Our VMS solution offers you incredible freedom of choice, with the ability to customize a video surveillance system to your specific needs. Vicon's extensive offerings of ONVIF-S compliant video devices and computer hardware components allow you to build a fully-integrated and future-ready surveillance solution.

ViconNet delivers the widest range of display options, from "surveillance in your pocket" smartphone viewing, video access to any PC, and virtual matrix display controller (VMDC) support for large, multi-monitor command centers. Whatever combination of displays you choose, you can count on consistent, intuitive and responsive interfaces that keep you in control.

Key ViconNet VMS Benefits and Opportunities

Powerful

- Streamlined recording management allows quick and easy setup of recording tasks.
- Intuitive search function allows users to quickly find devices.
- Event and alarm management combine video with data from a wide range of security systems into a unified SQL database.
- Easy archive wizard makes it a snap to create authenticated archives for playback on any PC.
- Monitor your ViconNet system anywhere using a smartphone, tablet or PC web browser.
- Automatically resizes the monitor display to maximum resolution even when moving between monitors.

Reliable

- ViconNet has been a critical component in securing thousands of installations worldwide.
- Professional Services give you peace of mind. Our unique program ensures ease of installation, consistent performance and long-term reliability.
- Vicon's line of compatible hardware and edge devices ensure a complete solution and single point of support.

Scalable

- From one camera to thousands, ViconNet is designed with the future in mind. Start small by downloading free JUMP for up to six cameras. Mid-sized installations benefit from ZONE with up to 24 cameras. Enterprise-level systems rely on PEAK, which offers unlimited scalability.
- Network multiple NVRs to build an enterprise scale system.
- Software upgrades and system integration keep you current.
- An open-platform system and compatibility with a wide range of products allow system expansion and versatility.

JUMP

- FREE
- Up to Six Cameras
- No Licensing Fees

ZONE

- Up to 16 or 24 Cameras
- No Licensing Fees with Vicon Cameras

PEAK

- Unlimited, Enterprise-Scale Systems
- No Licensing Fees with Vicon Cameras

Introducing ViconNet Version 8.0 VMS

Our newest VMS, ViconNet Version 8, offers improved performance, enhancements to the user interface as well as several new features. ViconNet Version 8 has been designed to fit all your security needs by increasing usability and strengthening the level of integration with all open-standard devices.

... with simple
and intuitive interface

"New" features...

Additional Integrations

With the addition of VAX Access Control and Express/HD Express integrations, we have improved interoperability of your video systems.

Updated Camera Connection

A connecting indicator will display in the tile, making it easy for the user to know the current status of the video.

Updated Archive Wizard

Users can start an archive directly by selecting the relevant cameras, eliminating the need to point to a specific database. Automatically searches all available databases for relevant video and archives from the best match.

Sorting Tools in Group Setup

Increased flexibility in creating and adding camera groups with the new sorting buttons.

User Interface Auto-Adjust

Freedom to choose between automatically fitting to the full screen resolution or keeping its native resolution while switching between monitors.

New Video Clip Export

Offers better clip resolution and faster exporting.

Archive Player Update

Playback authorization is no longer required for a user who wants to playback an archive.

Additional Layout Options

Users now have the ability to choose from popular 6 tile layout or a 10 tile layout in VMDC.

Complete Solution Compatibility

With ViconNet Version 8, we have strengthened the level of VMS integrations to include our VAX Access Control and Express DVRs/ NVRs. In addition, our partnerships with numerous 3rd party industry-leading manufacturers allow integration with IP cameras, encoders and edge devices, ensuring complete solution compatibility for all your security needs.

"New" integrations...

Compatible with Express Line

The Express line of NVRs and DVRs seamlessly integrate with ViconNet. Cameras being used with Express devices can be viewed and played back from the Site List.

VAX Vicon Access Control VMS Interface

ViconNet supports the Vicon Access Control (VAX) system. Connected cameras can be viewed and video recorded when users try to enter an access point.

Edge Device Support

Any device that supports edge recording and playback can be viewed or played back directly from the user interface.
