

ViconNet's graphic interface provides ease-of-use functionality through simple-to-understand icons and an ergonomic layout. The same look and functionality is common to both recorders and workstations, reducing learning curves and training costs.

Graphic "Network Tree" quickly links to other recorders for viewing of live and recorded video over the network

Check mark indicates proper authentication of recorded images

Drag-and-drop camera icons from the Network Tree to the viewing screen

Use mouse control for PTZ functions without a keypad

View any combination of 16 live and recorded images from multiple units simultaneously

Choose from full compression or activity-based as needed.

Set image quality up to 640 x 480 (768 X 576 pixels PAL) for local and remote video

**A New Network Concept
for Transporting and Storing
Digital Video and Audio**

A software concept that ties **Kollektor Elite** and **Kollektor Pro Series of Digital Recorders** into a new system architecture where recorders have the power of workstations and workstations have the power of recorders.

All **Kollektor Elite** and **Pro series** recorders rely on **Vicon Net** software, enabling a mixture of different recorders to interact on the same system

Vicon Net workstations have the same interface as the **Kollektor Elite** and **Pro** recorders, reducing operator learning curves and training time

WAN/INTERNET

Each **Kollektor** has master control station capabilities, able to configure any recorder or workstation remotely

Kollektor DVRs become master workstations, viewing and recording video from other recorders over the network

Multiple recorders and workstations can simultaneously view and record video at any resolution without common reductions in performance

Vicon Net reaches across **LAN, WAN** and **Internet** environments, transporting video and audio from any IP point in the world

PRODUCTS

Kollektor Elite and **Pro Series** recorders offer the power of **ViconNet** and are optimized for different system capabilities.

A line of superior performance digital recorders with enhanced network capabilities.

Digital recorders designed to satisfy most system requirements while still providing exceptional performance.

FEATURES

- Recording resolution up to 640 x 480 (768 x 576 Pixels PAL) with frame rate reductions
- Optimized MPEG compression produces unrivaled picture quality and recording duration
- Automatic operation programmed through macros and executed by the Scheduler eliminate many manual efforts
- Operating system hard drive, independent of video storage drives, allows servicing of units without removing the chassis

SPECIFICATIONS

	Kollektor Elite		Kollektor Pro		
Model	KE240	KE120	KP120	KP60	KP30
Video Inputs	16	16	16	16	16
Max Recording Rate (fps) NTSC (PAL)	240	120	120	60	30
Alarm Inputs	16	16	4	4	4
Audio Inputs*	16	16	4	4	4
Audio Outputs (speaker)	16	16	1	1	1
Operating System	Win™XP	Win™XP	Win™XP	Win™XP	Win™XP
