HEA30K

HEA30D

Elegant design weatherproof housing, constructed from extruded die-cast aluminium, for indoor and outdoor installations.

Its dimensions make it ideal for containing cameras with fixed lenses and compact zooms.

The frontal opening system allows an easy access to the camera.

A tight seal is ensured by EPDM-rubber gaskets and by 2 cable glands with their specific gaskets.

A complete range of accessories is available including: sunshield, normal or fan-assisted heating, blower and power supply for the camera.

It is also possible to install a blower including an air filter, replacing one of the cable glands.

The accessories are supplied factory installed or as a simple upgrade kit.

The values are in millimeters.
