

## WebWay Secure 980 Wall Mount

### Secure communications

The WebWay Secure 980 will greatly improve the safety of your property and premises by guaranteeing the security of vital communications.

Through the use of ISDN technology, WebWayOne has developed a sophisticated communications product capable of alerting a remote Alarm Receiving Centre (ARC) when intruder-entry and fire/smoke sensors are triggered. These sensors can include video cameras and audio devices, giving you the potential to monitor and record every aspect of the security breach.

The WebWay Secure 980 also has the option of adding GSM technology, meaning that the data can still be transmitted, even when intruders have cut your telephone lines. Including GSM and ISDN provides a continuous verification path for alarms meeting the requirements of ACPO 2000 (ACPO - Association of Chief Police Officers)

With an ability to continuously monitor the status of the alarm panel and individual detection devices, the WebWay Secure 980 checks the integrity of your security system and gives immediate warning of failures.

The result is a versatile and reliable communications solution for fire and security applications, with the added bonus that it can be used for routine business data and telephony connections.

The WebWay Secure 980 is the most advanced and secure means of connecting your security devices with a remote Alarm Receiving Centre. Modules are available to give a product that is

- High capacity - transmits data from a wide variety of sensors including video and audio
- Reliable - guarantees operation even in event of power or line failure
- Versatile - permits addition of telephone, modem, and internet systems with call prioritisation
- Low cost - Uses a Basic Rate ISDN telephone circuit
- Verifiable - Enabled for RedCARE ISDN and RedCARE GSM
- Intelligent - monitors status of sensors, and records pre-break in and post break-in audio
- Compatible - works in conjunction with all major alarm panels

The WebWay Secure 980 can be upgraded and adapted to meet specific customer requirements. Please call WebWayOne to discuss an individual application.

# WebWay Secure 980 Wall Mount

## Specification:

### Features

High speed ISDN access  
GSM voice, data and SMS access  
Dual data ports  
Dual telephone ports  
Remote configuration  
Password protection  
Emergency call override  
Low cost routing  
PABX functions  
16 Pin Alarms  
World-wide ISDN support  
Remote software upgrade (August 2001)

### Two data ports

Alarms, video and data  
RS232, X21  
V120, V110, PPP and MLPPP  
MSN, CLI and sub address support  
Optional X25 PAD support B or D Channels  
Optional Sync X25 B channel

### Two analogue ports (optional)

Digital communicator  
Telephone handset/headset  
Modem or DTMF  
PABX functionality  
Low cost routing  
Priority for 999 calls  
Priority for alarm calls  
Call barring  
Caller line identity

Remote configuration

### GSM module (optional)

Alarm backup  
Voice/Data backup  
Modem/DTMF backup

### Audio surveillance (optional)

Up to 4 channels with alarm pre-recording and zone monitoring

### Tamper proof enclosure

Steel wall mount enclosure  
Wall and cover tamper  
DC power with battery backup

### Power Supply

Integrated 230 Volts  
Battery backup

### Approvals

CE marked under European terminal directive

### Dimensions

Height 327mm  
Width 407mm  
Depth 88mm

### Ordering information

WebWay Secure 980 Wall Mount

### Includes

2 x Data Ports, B or D channel access

Pin alarms 16 outputs 3

Mains power

Battery backup

Tamper proof case

### Options

Dual telephone ports

GSM backup

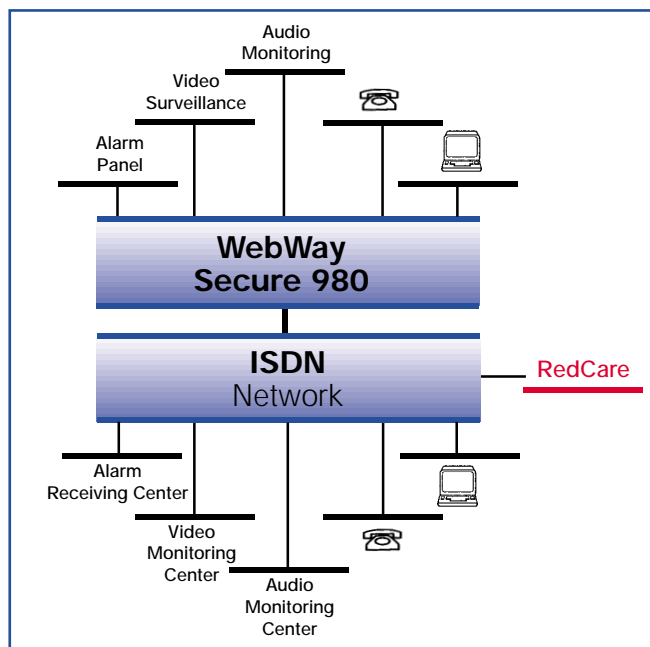

RedCARE ISDN

RedCARE GSM

X25 Pad B and D channel

X25 Sync B Channel

Audio surveillance module (available September 2001)

The information listed above should be taken as a guide only. Individual customers may require a high degree of bespoke design, and the Technical department at WebWayOne is always willing to discuss specific requirements.

WebWayOne reserves the right to alter and improve the specification of its products at any time.
