

SUCCESS CASE

Dahua DeepHub Business Meeting Solution Equips Achat Hotel with Integrated AI-powered Conference & Meeting Capabilities

Achat Hotel in Bochum, Germany offers comprehensive meeting and conference services, including both accommodation and catering. Due to the ever increasing demand for interactive meeting amenities, the hotel chose and implemented the [Dahua DeepHub Business Solution](#), providing integrated AI-powered conference and meeting capabilities for its guests.

Challenge

The 5 flexible and combinable meeting rooms of Achat Hotel in Bochum can accommodate various types of events, creating a high demand for these facilities. In order to be able to successfully hold forward-thinking events in today's digitalized era, such as hybrid events that integrate both in-person and online participants, the hotel needs a modern and user-friendly

digital conference solution.

Solution

"With DeepHub from Dahua, we have found the exact solution," explains Jorge Melendez, Sales Manager at Achat Hotels. "We installed a 98-inch DeepHub in our largest conference room. DeepHub impressed us above all with its ease of use. It has both a Windows and an Android interface, so our guests who are familiar with computers or smartphones can use it intuitively straight away. With online sharing and connection via a dongle, our guests don't need to download any software. Meetings start faster and participants can focus on the essentials. The 98-inch DeepHub is large and bright enough. In a conference room for 80 people, everyone can see everything clearly without the need to darken the room. The wireless connection makes setting up a meeting incredibly easy. The handwriting function is also excellent – converting handwriting to printed text without any delay in writing is extremely

useful."

Nina De Rosa, Director of Achat Hotel in Bochum, adds: "The built-in camera makes it easy to make video calls via platforms such as Teams and Zoom. The integrated speakers are of high quality and do not generate background noise. The latest DeepHub Meeting software is very popular with our guests. Especially for those who organize seminars and workshops in our hotel, DeepHub Meeting is extremely convenient. It is not only an optimized online conference software, but also offers a variety of practical tools for teamwork, discussions and brainstorming. Online participants can also use the free DeepHub Meeting app to take part in the on-site seminar and get actively involved."

Results

The Dahua DeepHub Business Meeting Solution has elevated the conference rooms, event venues, and other facilities of Achat Hotel in Bochum, taking it to the next level. It not only changed the way the hotel holds meetings, but also significantly enhanced the experience and satisfaction of their guests.

"Dahua provides robust and easy to move stands with wheels for each DeepHub. We have just purchased a second 86-inch DeepHub. During the European Championship soccer season, we were able to move the DeepHub onto the terrace in the evening so that our guests could watch soccer matches together. And the same device is used for workshops and seminars during the day. We can even set up the DeepHub in the bar. It's not just a screen, but also an interactive platform that offers our guests many entertainment options," says Markuz Metz, Technician at Achat Hotel in Bochum.
