Keep staff rooms secure and private
(35 characters)

Market profile content:

Code Handle offers a simple solution for keeping private rooms private, allowing access only to those who require it. The PIN code setting allows you to keep control of who has access, particularly important when you want to keep items away from children.

In primary schools, Code Handle protects every room you don't want pupils to access. So only authorised teachers and support staff, know the code to unlock the door. All you do is enter the code on the handle's keypad and the door opens.

Code Handle works together with your existing locking unit: keep your cylinder or lock and just change the handle to a battery-powered Code Handle. No need to cable the door, connect it to the mains or install an electronic access control system. It's perfect for staff offices, kitchens, store rooms, staff toilets etc, any school room you wish to remain private.

Code Handle has various benefits including:

Auto-lock

Staff rooms are used many times throughout the day, there does no more need to remember to lock up behind you.

Easy to install and retrofit

All it take is two screws and two minutes of your time, to fit a Code Handle on almost any interior door.

Keyless and convenient

Secure rooms with no keys, no wires and no expensive access control system. It is simple with Code Handle.
