

A hospital's first priority is patient health and safety. Aperio® wireless technology provides the freedom to focus on those goals, offering the accountability, convenience, and security needed to operate effectively and efficiently. This innovative solution allows the hospital to manage many openings, protect employees, patients and visitors, ensure compliance, reduce costs, and protect valuable equipment and supplies. Here are just a few examples:

Supply cabinets

- Monitor and control access to pharmaceuticals
- Enable pharmacists and nursing staff to access medications quickly using their ID badge
- Ensure regulatory compliance
- Reduce costs associated with shrink/diversion

Equipment carts

- Monitor and control access to supply carts with medical equipment and controlled substances
- Enable nursing staff to access equipment and medications quickly using their ID badge
- Ensure regulatory compliance
- Reduce costs associated with shrinkage/diversion

Staff lockers

- Allow hospital staff to access their belongings using their ID badge
- Provide convenience without sacrificing security
- Reduce hospital liability for lost belongings

Pass-through cabinets for patient rooms

- Enable controlled access for pharmacists to disburse medication from the hallway using their ID badge
- Enable controlled access for nursing staff to dispense medication from within patient rooms using their ID badge
- Ensure regulatory compliance
- Reduce costs associated with shrink/diversion
- Reduce hospital liability

In-room storage for patient valuables

- Allow patients to secure belongings in their rooms
- Reduce hospital liability for lost or missing items of patients and visitors
- Reduce costs of replacing lost items
- Reduce patient stress

Nurses' station

- Allows nursing staff to secure belongings at their respective station
- Provides convenience without sacrificing security
- Reduce hospital liability for lost or missing items of staff

Clean and soiled utility room

- Monitor and control access to gowns, masks, scrubs, gloves, linens, etc.
- Reduce costs associated with shrink/diversion
