FACT: Over 90% of networked access control systems have less than 30 protected doors

“The latest range of products demanded an evolved offering whilst featuring a unique style identifiable as a member of the ACT product family.”

Brendan Dolan,
Mechanical Design
Engineer, ACT.

ACT's latest access control solution has been designed to suit all types of SME's located in a single building and not requiring more than 32 protected doors. The IP controller can be set-up and administered via its built-in web server or through the established ACTWin software application. The new reader range combines ACT reliability with a modern and elegant design that will fit into any environment.

ACTpro 1500 single door IP controller

The ACTpro 1500 is a single door IP controller that includes a built-in web server for simpler set-up and configuration. It is expandable to up to 32 doors via ACTpro door stations and supports 15,000 users.

Key Features

- TCP / IP – DHCP/Static IP addresses
- Built in web server or PC application
- Voltage monitoring
- Break Glass monitoring
- Status LEDs for fault indication
- Raised PCB and more space in the enclosure for cable management

Web Server

For sites with only one ACTpro 1500 the built-in web server can be used to set-up and administrate the access control system.

Key Features

- Reduces the potential for IT issues e.g. getting access to a PC, passwords, etc when installing applications.
- Reduces the time needed to configure and administer the system.
- Minimal end user training required due to the simplicity of the web interface.
- Access the ACTpro 1500 system, via a web browser, from any PC on the LAN

ACTpro Readers

The new pro reader range combines the reliability that is expected from ACT readers with a sleek new design that will suit the aesthetics of any building.

Key Features

- pin, pin & proximity or pin only options
- mullion, surface or flush mount options
- indoor / outdoor (IP67)
- keypad backlighting
