

Video Management Software

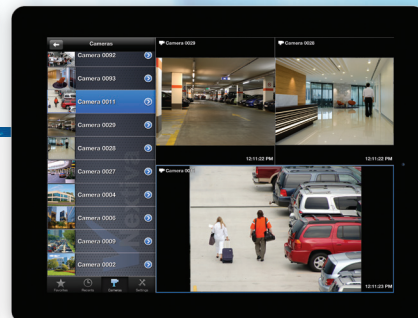

Scalable IP Video Solutions:
Entry-to-Enterprise Level Options

Nextiva® Review™ gives users a simple view of system cameras with an array of tools that let you customize screens to maximize views.

Nextiva Control Center™ provides an easy interface to manage your system, add cameras, change users and more!

Nextiva Mobile™ allows you to connect to your system on the go. See video when away from your desk, on patrol, at home or on the road.

Upgrade Your Video Security System Today with Nextiva Video Management Software

Take your security to the next level with Nextiva Video Management Software™ (VMS). The Nextiva software helps streamline video security operations and helps you rapidly make sense of the vast volumes of video and data you capture. Set up and configure an optimal video network with Nextiva, using Control Center software to configure varying aspects of your video recording needs—from individual camera configurations to advanced user viewing privileges. Nextiva Review monitoring client provides visibility to your cameras and is available for desktop, web-based, and mobile device applications.

Powerful Video Management Solution to Grow with Your Business

Nextiva is designed to scale with your organization's security challenges and can easily expand as you add more users, more cameras and span across more facilities. We offer a variety of programs to help accommodate your needs. Organizations that require 64 channels or fewer can start with the Nextiva Base software, which comes with 4 channels and 1 Nextiva Review client. If you need more than 64 channels, upgrade to the Nextiva Advanced, which gives you 4 additional channels of video and helps you grow to 150 channels throughout your system. Nextiva Enterprise is available for organizations that need more expansive visibility and the ability to connect to multiple sites.
