Carrier Corporation is pleased to announce the launch of the TruVision Multi-imager panoramic camera that can be deployed for a wide range of security and surveillance applications.

**TruVision Multi-imager camera**

The TruVision Multi-imager camera is an ideal security solution for surveillance applications that would normally require multiple cameras installed at different positions, such as parking lots, large lobbies, or other open spaces.

This multi-imager camera consists of four individual camera sensors that can be repositioned to
The camera is suitable for both indoor and outdoor applications.

**Compatible with TruVision Navigator and recorders**

The TruVision Multi-imager camera is fully compatible with TruVision Navigator and TruVision recorders.

Compared to the other traditional cameras that would each require individual cabling, camera license and network connection settings, the camera requires only 1 network cable, 1 network connection and 1 camera license.

The TruVision Multi-imager camera is fully compatible with TruVision Navigator and TruVision recorders. This apart, the camera also seamlessly integrates with a wide variety of 3rd party applications through ONVIF.

**Repositioning of camera sensors for 360° surveillance**

The TruVision Multi-imager camera is considered perfectly suited for a wide range of surveillance applications, including installation at shopping malls, schools and colleges, large commercial buildings, parking lots, factories, warehouses, airports, ports and other critical infrastructures.

Repositioning of the camera sensors allow user to position the camera heads so as to avail full 360° wide surveillance capability. Also, when the camera is mounted on the corner of a building, 3 camera sensors can be positioned to cover 270° view, while the 4th camera can look down to cover the area under the camera.

The repositioning of TruVision Multi-imager camera sensors facilitates greater flexibility for a broad range of different scenarios and settings.
