UVS And Advancis Announce Integration Of WinGuard Open PSIM Software With Lucidity Video Wall Manager

Published on 24 Jul 2020

Video wall technology experts Ultimate Visual Solutions (UVS) have worked with PSIM manufacturers Advancis to integrate their WinGuard security and building management software application with the UVS Lucidity video wall controller. The integrated solution, which will be further developed to meet specific project requirements, is now being demonstrated to potential clients at UVS’s HQ and northern demonstration facility in Burnley, Lancashire.

WinGuard from Advancis unifies control of security, building automation, IT and communication systems and provides operators with an instant picture of full situational analysis for decision making, command and control of all systems.
Physical Security Information Management

The benefits of the newly-integrated system include:

- Complete range of video wall display technology to suit the client requirements
- From WinGuard, any required data and source type can be displayed anywhere on the video wall(s) in any format, including IP video, graphic sources, message boxes, web browsers
- Enhances proactive event and incident management
- Increases situational awareness for operational staff when dealing with critical events
- Seamless control and automation of the video wall from within the WinGuard application

UVS Managing Director Steve Murphy said: “We are delighted to be working closely with a global leader like Advancis and this integrated technology enhances our overall offering, bringing significant and tangible benefits for the client.” Advancis are at the forefront of the PSIM (Physical Security Information Management) industry with offices and partners around the world. For more than 25 years they have developed a truly open software platform with over 450 supported system integrations.

Video wall controller

Allan Dickinson, Technical Manager UK at Advancis, said: “With the integration of partner systems like the UVS Lucidity video wall controller, we can offer a comprehensive functional scope and a joint value solution for our customers. Advancis are looking forward to exploring opportunities to work closely with UVS in the future.”
UVS is based at Business First Burnley Business Center and provides video wall displays and audio visual solutions to a range of clients across the UK and the rest of the world. It is led by four senior colleagues who, between them, have more than 70 years’ combined Audio Visual, Control Room and Visual Solutions experience.
